SC fumes at notice sent to student despite its order

Officials Call It An Oversight, Promise Action

Dhananjay.Mahapatra @timesofindia.com

New Delhi: Taking a serious view of the Greater Noida executive magistrate issuing notice for keeping peace to a law student for participating in protests at Jantar Mantar, Supreme Court said no authority can violate its Sept 1 order quashing all FIRs against students and barring penal action against them for protesting against NEET paper leak.

Citing a **TOI** report, senior advocate Biswajeet Bhattacharya told a bench of Chief Justice Surya Kant that the executive magistrate has committed contempt.

"There is no question of any authority taking any action against students for participating in the protest. That order in no uncertain terms prohibits every state govt and its authorities from taking any action against students," SC said.

The notice, issued by a cop, was withdrawn, with officials claiming it was an oversight and promising action against individuals concerned.

> We would have taken immediate cognisance of the notice but for the fact that they have withdrawn it. But we are surprised that the executive magistrate issued notice to the student. **Our order was crystal clear even to a layman that all FIRs are quashed**, no fresh FIR is to be lodged, and **no punitive or coercive action is to be taken** against any student for participating in the protest
> —Supreme Court

▶'Order was clear', P 3

UP govt to move SC against HC quashing NSA

New Delhi: Solicitor general Tushar Mehta told SC that UP govt will challenge the order of Allahabad HC quashing the detention of DU graduate Aakriti Choudhary under National Security Act for taking part in the protests by trade unions in Noida in April.

In its order, HC had also told IAS and IPS officers that their loyalty should be towards the Constitution and not to the political executive.

HC had quashed Choudhary's detention and awarded her a compensation of Rs 5 lakh, which is to be recovered from salaries of the district magistrate and other officials responsible for preparing reports leading to her detention under NSA. TNN

'Liars': HC raps cops over CCTV tech snag claim

In a case of illegal detention of 4 men in Deoria, Allahabad HC criticised police, suggesting investigators were "a bunch of liars" after they claimed CCTV footage for the detention period was unavailable due to a snag. When the SP apologised to court, the bench said, "Apologise to people." OTHER BOOK, P 4

File FIR against 15 cops: Rights body to Maha DGP

Maharashtra State Human Rights Commission has directed the DGP to register an FIR against over 15 Pune police officers, ranging from the commissioner to a constable, for allegedly illegally detaining eight minors in a murder case for five days and assaulting them in public. OTHER BOOK, P 4

SC orders govt to pay ₹15L for retiring officer

SC has taken strong exception to the Centre declaring an "outstanding" ITS officer as "dead wood" and punishing him with compulsory retirement, and directed that all pecuniary benefits and notional promotion to him be restored. Govt was also ordered to pay him Rs 15 lakh. OTHER BOOK, P 4

Can husband be tried for marital rape if law says not offence: SC

Agrees With Govt that Matter Lies In Parl's Domain

New Delhi: Citing Article 20 (1) of the Constitution which shields persons from prosecution for an act which is not an offence under existing penal laws, the Supreme Court on Wednesday asked whether a husband can be prosecuted for marital rape when the law categorically states that it is not an offence, even as it agreed with the Centre that the matter should be left for Parliament's consideration, **reports Dhananjay Mahapatra.**

Article 20(1) provides that "no person shall be convicted of any offence except for violation of law in force at that time…" Section 375(2) of IPC said "sexual intercourse or sexual acts by a man with his wife, the wife not being under 15 years, is not rape" (wife's age was raised to 18 by SC in 2017), with the provision replicated in Sect 63(2) of BNS.

> It is not a question of class, but a question of an individual when it comes to crime. **We can't see Constitution in silos. When it comes to Art 21 rights, it equally impacts right under Art 20.** When we examine penal laws, we must factor in elements of mens rea, culpability & way we interpret Constitution so we don't spring surprises on our citizens —SC

Absconding Satya Niketan PG operator held, ran 7 such facilities in same area

New Delhi: Delhi Police has arrested the man who used to run a PG facility on four floors of the building that collapsed in Satya Niketan under the name Hostel Daze. Police suspect he runs a total of seven such facilities in the area under the same name and are probing his entire operation. This building collapsed on Sept 6, leaving seven people dead.

The operator, Shudhanshu Lovneesh (31) has told cops that he had taken four floors in the ill-fated building on lease, along with associate Shubham Tyagi, in Aug last year for Rs 1.05 lakh per month. Tyagi is absconding.

They managed to rent the building cheap due to its dilapidated condition. TNN

Make govt sites user-friendly, PM tells mantris

New Delhi: PM Modi is learned to have told ministers to make govt websites "user-friendly" to access information about welfare schemes and public services easily, and has advised Cabinet colleagues to be assertive while dealing with those who level unfair and baseless criticism, **reports Dipak Dash.**

The PM's direction comes months after cabinet secretary T V Somanthan advised all ministries and departments to overhaul their websites to make them easier to navigate. At the last council of ministers' meeting, Somanathan had referred to a report by Economist that had flagged how govt websites in India remain difficult for ordinary citizens to use.

West Asia conflict likely hindrance to cementing BRICS declaration

Manash.Gohain@timesofindia.com

New Delhi: India's push for agreement at the BRICS summit beginning Sept 12 faces divisions among its members over the West Asia conflict.

Russian officials, speaking to their country's media, have acknowledged difficult negotiations, while Brazilian reporting has raised doubts about a strong final declaration. Yet Chinese commentary has highlighted opportunities for India's presidency, including closer trade ties. These contrasting accounts suggest that the challenge for New Delhi is to keep economic cooperation moving while finding language that countries with conflicting security interests can accept.

Bangladesh likely to skip the summit

With Bangladesh PM Tarique Rahman not keen on visiting India, Bangladesh is likely to skip BRICS summit. Dhaka has not nominated anyone to represent Bangladesh in the summit for which PM Modi had invited Rahman in the latter's capacity as chair of BIMSTEC. OTHER BOOK, P 5

The Sept 12–13 summit at Bharat Mandapam will bring these differences into focus. A final declaration records the common positions that participating countries have agreed to support.

Lal Mandir first target: Red Fort chargesheet

The chargesheet filed by NIA in the Red Fort blast case says bomber Umar-un-Nabi's first target was 'Lal Mandir' in Chandni Chowk. He tried to park the car near 'Lal Mandir' but diverted due to heavy traffic and police presence there and reached near Gate No. 4 of Red Fort, where he triggered the IED, says the chargesheet.

NIA has said the vehicle-borne IED was detonated through a remote 'command mechanism' fitted in one of the shoes of Umar-un-Nabi. A metal piece attached to the heel of one shoe was found adjacent to the i20 used by bomber Umar, and it tested positive for triacetone triperoxide, potassium and ammonium nitrate. OTHER BOOK, P 2

'AI could kill us': Researchers sound alarm

A researcher at AI firm Anthropic quit on Tuesday with a warning over rapid progress in the field, which he fears could kill humanity as soon as 2030, **reports Chidanand Rajghatta.**

"People building AI earnestly believe it could kill us all by the end of the decade. This is not a marketing stunt," Coxon wrote on X while announcing his resignation. His colleague, Evan Hubinger, Anthropic's Alignment Science lead, agreed. "Jacob is correct here—we really do earnestly believe AI could kill all humans!" SEE OTHER BOOK

Analogue alarm: How synthetic paneer takes a Gondola ride to your plate

Anjali Singh & Nikhil Sharma | TNN

Standing outside a closed gate that looks like the entrance to a foundry, the man who identifies himself as Imran asks what we want.

"Paneer," we say. "Do you take large orders?"

"Any quantity," he replies. "We supply to many places in Delhi, Gurgaon and Faridabad. Within a day, we can supply as much paneer as required to Chandigarh."

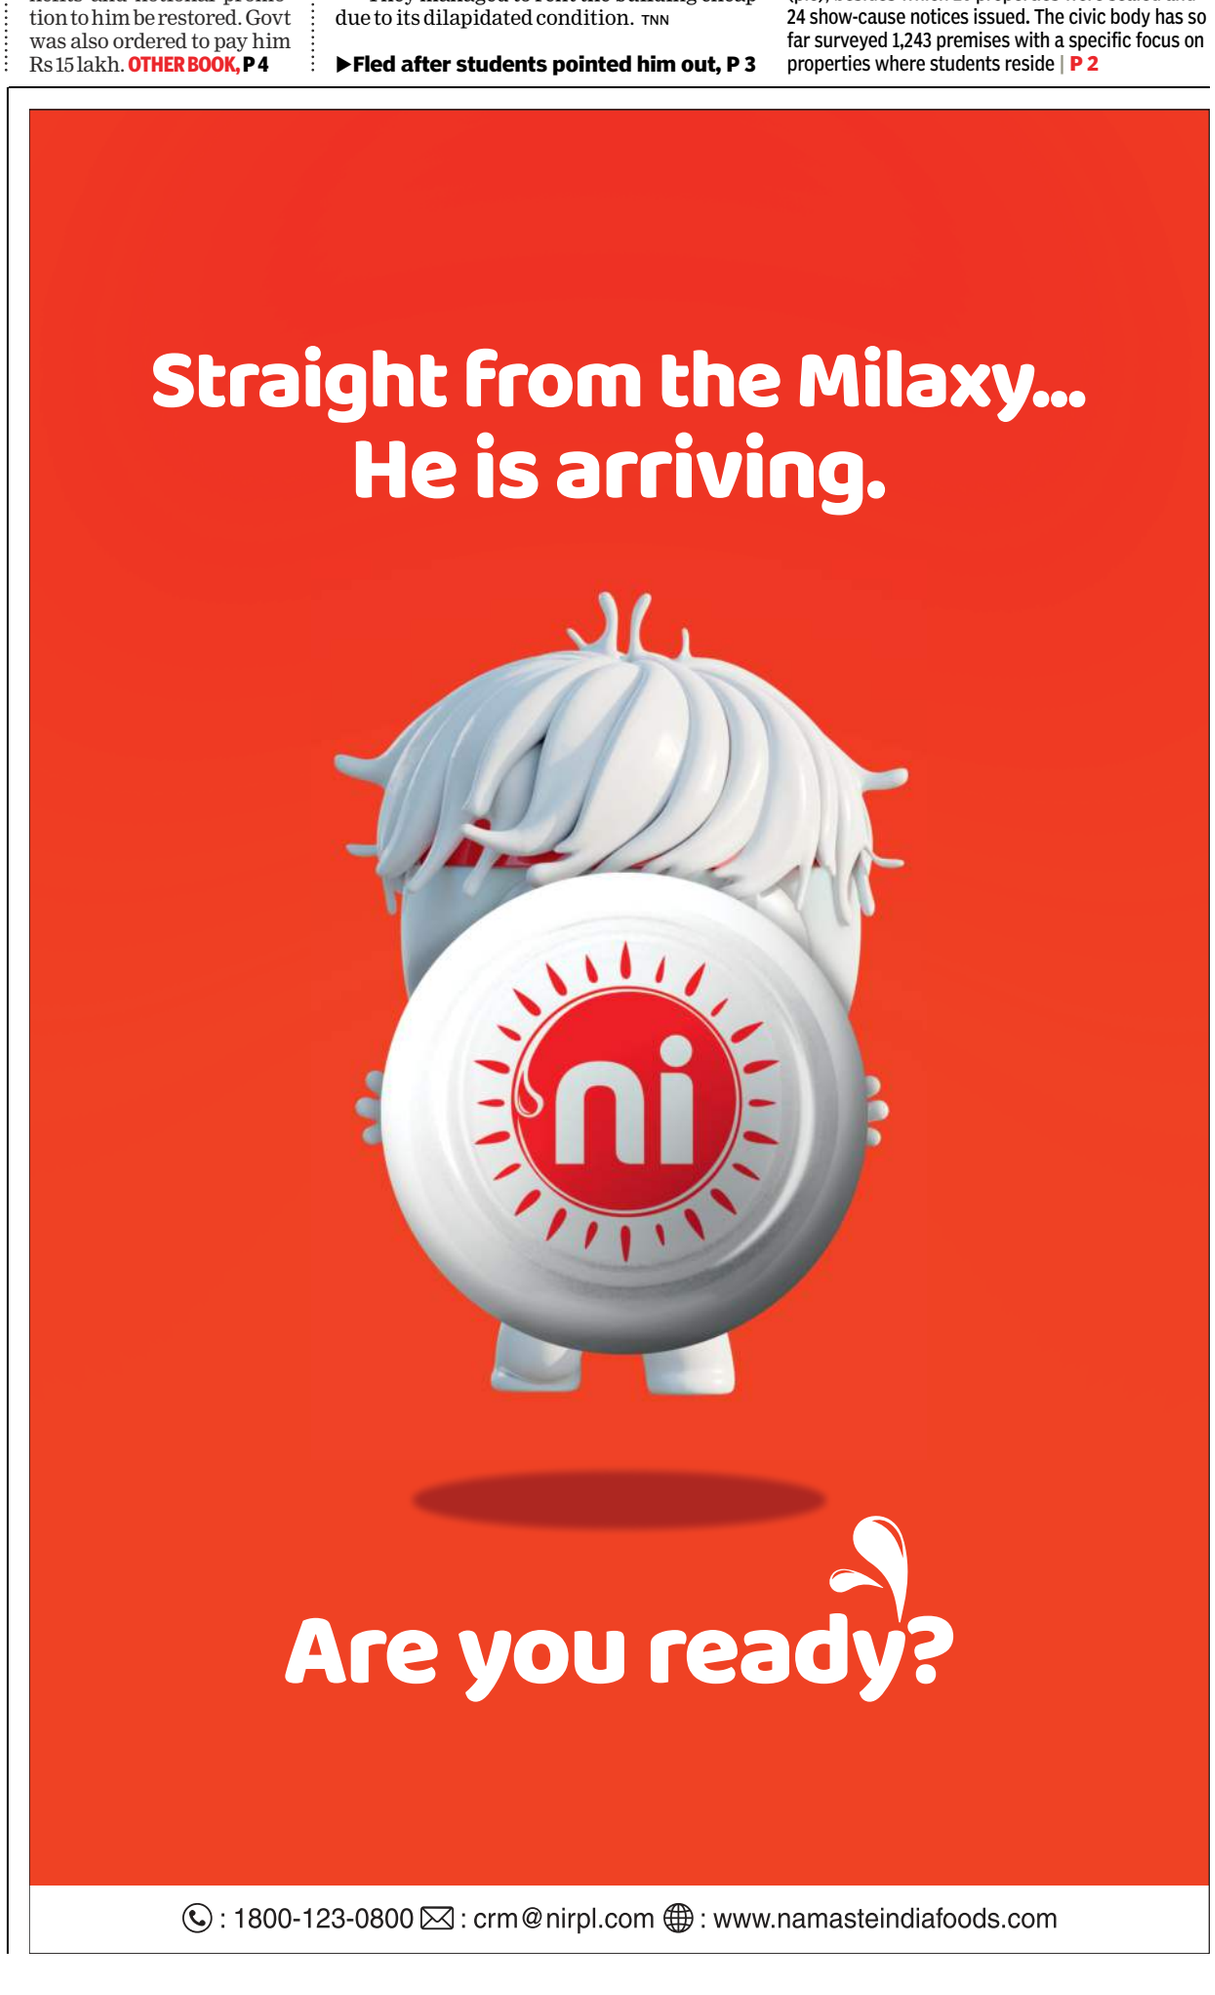

Imran wasn't exaggerating. There would be few lives in Delhi-NCR and the vast agglomeration of towns and villages around it that the foundry-like units operating in a cluster here – Gondola village in Nuh's Punahana block – would not have touched.

TOI

Great Escape: How These Two Teens Defied Death

Being Away From PG Saves Duo, But Loss Of Friends Rankles

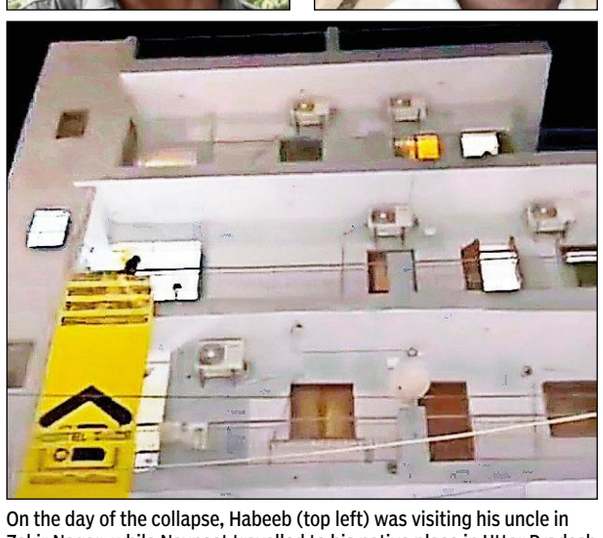

Abhay@timesofindia.com

New Delhi: For Habeeb Khan and Navneet, both 19, being away from their PG accommodation on the day of the building collapse in Satya Niketan proved to be the difference between life and death.

Habeeb was visiting his uncle in southeast Delhi's Zakir Nagar, while Navneet travelled to his village, Kila Parikshitgarh, in Uttar Pradesh for Janmashtami. Both were expected back in Satya Niketan Sunday, but instead learnt through phone calls and WhatsApp messages that the building they used to stay in had collapsed.

On the day of the collapse, Habeeb (top left) was visiting his uncle in Zakir Nagar, while Navneet travelled to his native place in Uttar Pradesh

HABEEB SAYS

It did not look like an old building. Construction work was on for the past 10 days. I used to live on the first floor and could hear the noise and feel the vibrations

Habeeb's belongings were buried under the debris. Cops from South Campus police station found a bag containing Rs 40,000 in cash and, after verifying his identity, called him and handed over the money. His father later mentioned the incident in a social media post, thanking police.

The PG had recently been painted inside and outside, giving it a spanking new appearance, Habeeb said. "It did not look like an old building. Construction work was on for the past 10 days. I used to live on the first floor and could hear the noise and feel the vibrations," he said.

A BA programme student at Motilal Nehru College, Habeeb has been staying at the PG for around a month. The accommodation had a capacity of 16 beds and charged around Rs 16,000 a bed per month, he said, adding that only two beds were empty.

With his birthday and a festival falling around the weekend, he decided to spend some time in Zakir Nagar, he said, adding, "I lost some friends to the tragedy."

For Navneet, a simple request from his roommate and friend, Arpit Jaj, is the last memory he has of him. "Come soon, Navneet. I want to have cold coffee made by you," Jaj had told him on the phone a few hours before he died in the collapse. Another close friend, Akshit Yadav, also perished.

NAVNEET SAYS

At first, I thought a part of the building had collapsed. I did not realise the extent of what had happened. All my original educational certificates were buried under the debris

Navneet was staying in Room No. 302 on the third floor of the PG for around a year. He said the accommodation appeared less cramped than other PGs they had checked out. "This was the only one where we could get a room with a balcony," he said.

Navneet was supposed to return to Satya Niketan with his uncle early Sunday, but the plan fell through. He learnt about the incident from his native place. "At first, I thought a part of the building had collapsed. I did not realise the extent of what had happened," he said, adding that he didn't suspect the PG was structurally unsafe.

"All my original educational certificates were buried under the debris, along with my clothes and everything else. I want my documents, especially my Class X and XII marksheets," the second-year BA programme student said.

However, returning to the locality is out of the question. "I don't think I will be able to go back. I don't think I am in that condition," Navneet said.

GEETA COLONY

The civic body continued its drive against dangerous and unauthorised structures. On Wednesday, it carried out 46 demolitions across the city

New Delhi: MCD Wednesday intensified its crackdown on unauthorised, ongoing or recently constructed fifth-floors, days after the Satya Niketan building collapse.

Seven buildings where fifth floors are under construction in violation of norms were identified in Najafgarh zone and seven in Keshavpuram zone, MCD said. In all, 52 buildings were identified across the 12 administrative zones and will get notices.

A senior MCD official said: "Notices for unauthorised construction are first served, giving the owner a week to take corrective action. Thereafter, a demolition order is issued and action can be taken after another two weeks."

The building departments of all 12 zones have been directed to identify structures that violate height norms under the Unified Building Bye-Laws and MPD rules and serve notices to defaulters. "Department officials have been told they could face action. Enforcement (of rules) against such structures will be intensified," an MCD official said.

MCD commissioner Sanjeev Khirwar has stressed on instructions to act against the ongoing illegal construction, following the CM's direction.

The civic body Wednesday carried out 46 demolition actions across the city. In addition, 20 properties were sealed, 24 show-cause notices issued and 31 demolition/sealing orders passed.

In Kucha Chelan, Jama Masjid, two roof panels at the ground-floor level and a partition wall were demolished with assistance from the Jama Masjid police station. Similar action was taken against an unauthorised structure in Bazar Sitaram in Sadar Paharganj zone.

In Najafgarh, action was taken against properties declared dangerous in Vikas Nagar, as also in Sector 17, Dwarka. In Keshavpuram zone, demolition was carried out in Rana Pratap Bagh. At a property in Model Town, three RCC slab panels were demolished and the reinforcement was cut using a gas cutter.

"The drive against unauthorised construction, misuse of properties and dangerous structures will be further intensified in the coming days," officials said.

MCD also continued demolition work on building number 13 in Satya Niketan, next to the building that collapsed on Sept 6.

The civic body till Wednesday, identified 1,243 buildings where PGs operate. These buildings accommodate around 24,000 occupants.

"The buildings are being categorised as visibly safe but requiring minor repairs, visibly repairable and requiring major repairs, and visibly vulnerable, falling under the dangerous category," officials said.

HC seeks govt and DU stand on petition for more hostels

TIMES NEWS NETWORK

New Delhi: Delhi High Court Wednesday asked Centre, Delhi govt and Delhi University to place their stand on a plea by a student outfit functionary seeking an expansion of hostel facilities across all DU colleges.

The PIL was by NSUI president Vinod Jakhar, who raised the issue of "acute and longstanding shortage of affordable and adequate institutional hostel accommodation" for students of DU.

A bench of Chief Justice DK Upadhyaya and Justice Tejas Karia issued notices to the authorities and clubbed the plea with a petition related to the Satya Niketan building collapse, and listed the matter for Sept 25.

Even after over 104 years of the university's establishment, and despite an enormous rise in student strength and geographical expansion, residential infrastructure has not developed proportionately, the plea said.

A large number of colleges do not have hostels. In those that do, the number of seats is grossly inadequate, it said.

The PIL said this "institutional deficit" compels thousands of outstation students to seek accommodation in private PG facilities, private hostels, rented rooms and shared flats.

It said the Satya Niketan tragedy cannot be viewed merely as an incident concerning one building. The PIL sought directions to authorities to do a college-wise assessment of hostel capacity and demand, and formulate a time-bound DU Hostel Development Policy or master plan.

The court this week also ordered a high-level MCD inquiry into the Satya Niketan building collapse.

LG asks DDA to identify land parcels for PGs for students

TIMES NEWS NETWORK

New Delhi: Delhi govt will explore options of safe and affordable PGs for students, with LG T S Sandhu Wednesday directing DDA to identify land parcels and prepare a plan.

LG met DDA vice-chairperson N Saravana Kumar to review options. He directed DDA to engage with university officials on provisions of the new Master Plan that could facilitate development of hostel facilities.

Sources said one proposal being explored is allowing colleges to partner with establishments outside their campuses, with colleges having the responsibility of overseeing safety standards. The model could include college-supervised facilities and privately operated PGs. Going vertical is another option that DDA and govt are expected to explore, with provisions in the Master Plan allowing for greater use of vertical space for accommodation, the sources said.

The proposed policy is expected to bring PGs under a regulatory framework, with mandatory operating licences, zone-wise rent bands and structural and fire safety audits. A central GovPG portal has been proposed to provide a common platform for such accommodations.

Govt is also examining measures to increase hostel capacity by allowing higher floor area ratio limits for universities. Another option under consideration is converting vacant govt properties into student hostels. Sources said discussions will be held with PG managements, parents and civic agencies. The proposals will then be taken up with CM Rekha Gupta.

Bail to 5 in DJB 'scam', court cites 'pre-trial punishment'

Koushiki.Saha
@timesofindia.com

New Delhi: A Delhi court Wednesday granted regular bail to five accused in the Delhi Jal Board (DJB) sewage treatment plant tender case, holding that their continued custody would serve no useful purpose and that keeping them behind bars before the allegations were proved would amount to "pre-trial punishment".

Special judge Dig Vinay Singh held that the prosecution's claims regarding an ongoing money-trail investigation, alleged non-cooperation by the accused and the need for further custodial interrogation did not justify their continued detention. The court also noted that Enforcement Directorate (ED) had investigated the alleged proceeds of crime without arresting several of the accused.

The prosecution alleged that the accused manipulated the tender process for augmentation and upgradation of 10 sewage treatment plants (STPs), tailored technical specifications to favour Euroteck Environmental Pvt Ltd and caused losses to the public exchequer.

It alleged a Rs 4.7-crore kickback trail, including Rs 2.7 crore routed through Srijanhar Enterprises, Rs 81 lakh paid to Vinod Chauhan, Rs 43 lakh to AN Enterprises and Rs 61 lakh transferred to former DJB CEO Udit Prakash Rai. It also alleged a Rs 75-lakh hawala transaction.

On Rai, the court said the allegation of non-cooperation appeared unreasonable as he was posted in Mizoram and had sought 10 days to join the investigation. "The sudden arrest of A-2 and others, therefore, is questionable," the court observed.

On the alleged kickback, it said: "One wonders why a person seeking kickbacks would do so through banking channels. If that amount was a kickback, why would he repay it, that too with interest?"

The court also noted that Rai was a "non technical person from executive" and that the tender notesheet had originated from executive engineers.

The court granted bail to all five accused on furnishing bonds of Rs 2 lakh each. Former DJB minister Satyendar Jain was earlier granted bail in the case.

With Dengue 'Homework', Students To Lead Fightback

To Mark Findings On Card, Repeat Exercise Every Week

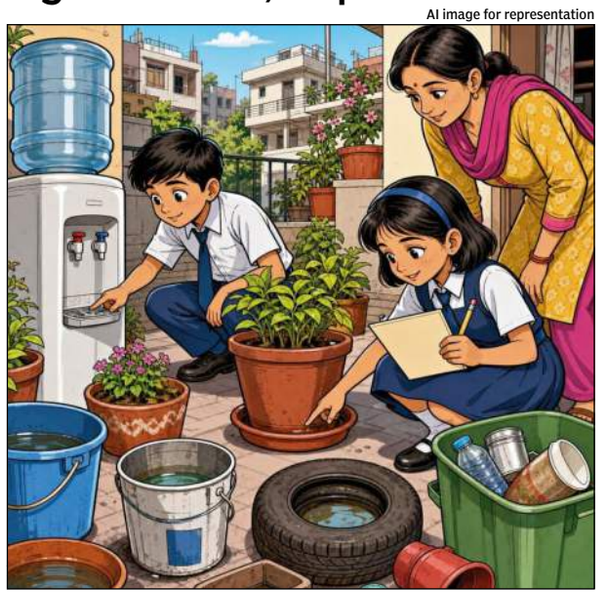

Meghna.Dhulia
@timesofindia.com

New Delhi: Check the cooler. Look inside flower pots and trays. Inspect buckets, discarded containers and any other place where water may have collected. Mark the findings on a card and repeat the exercise every week.

This is the "homework" Delhi schoolchildren are being given as the city steps up its fight against dengue and other mosquito-borne diseases. Under the 'dengue homework card' initiative, students are given cards that they are expected to fill after checking their homes for potential mosquito-breeding sites. Teachers, in turn, have been told to monitor the exercise regularly and ensure that all rows and columns on the cards are duly filled.

"The idea is to make the child an active participant rather than simply giving them an advisory on dengue. The card essentially becomes a weekly checklist. A student checks places at home where clean stagnant water can collect, records it and, with the family, ensures that breeding conditions are removed," an education department official said. "Since the card comes back to school, teachers can also see whether the exercise is being carried out regularly."

AI image for representation

AN EDUCATION DEPARTMENT OFFICIAL SAYS

The idea is to make the child an active participant rather than simply giving them an advisory on dengue. The card essentially becomes a weekly checklist. A student checks places at home where clean stagnant water can collect, records it and, with the family, ensures that breeding conditions are removed

The exercise is part of a prevention drive ordered by Directorate of Education (DoE). In a Sept 8 circular, DoE said it had received an advisory from Municipal Corporation of Delhi and directed all govt, govt-aided and private unaided recognised schools sures. The directions also reiterate its earlier instructions.

The concept is not entirely new. Delhi govt earlier recommended training children to identify and eliminate mosquito-breeding sites at home, in neighbourhoods and schools. One such advisory had suggested that children could cover and monitor open water containers at home under adult supervision, while schools could use the homework cards to sustain the exercise beyond awareness sessions.

The monsoon and post-monsoon months are a key transmission period for vector-borne diseases in Delhi, when water accumulating in containers and other sites can provide breeding grounds for mosquitoes. DoE, in previous years, too, intensified school-level precautions during this period, including weekly checks for stagnant water and awareness activities.

The latest directions have also asked schools to encourage students to wear full-sleeved clothes or uniforms between Aug and Nov to reduce their exposure to mosquito bites. Schools have been asked to sensitise students and parents about the preventive measures.

Principals or school heads have been made responsible for ensuring strict compliance with the directions on campus. At the administrative level, district and zonal officials have been asked to monitor implementation across schools under their jurisdiction and ensure that the preventive measures are being followed. A compliance report detailing the action taken by schools must be submitted by Sept 15.

Our order was crystal clear even to a layman: CJI

▶Continued from P1

We would have taken immediate cognisance of the notice but for the fact that they have withdrawn it. But we are surprised that the executive magistrate issued notice to the student. Our order was crystal clear even to a layman that all FIRs are quashed, no fresh FIR is to be lodged, and no punitive or coercive action is to be taken against any student for participating in the protest," the CJI said.

Bhattacharya, who has not filed any petition on behalf of the student or a PIL, said this is a method of experimentation by the authorities as to whether they could still proceed one way or another against the students. He insisted that issuance of notice to the student, despite its withdrawal later, is contempt of court. "Executive magistrate committed contempt and later withdrew the notice," he said.

The bench said, "You place all these documents for the court to take cognisance of the issue, and we will seek explanation from the executive magistrate." It is doubtful whether Bhattacharya would be able to place the documents on record as he had no other piece of paper except media reports in his hand, which he handed over to the court-master.

PG operator fled after students identified him

▶Continued from P1

A Delhi court remanded Lovneesh and two others — building owner's son Mahesh Gupta (52) and contractor Sanoj — in two days in police custody

A resident of Bhajanpura, Lovneesh graduated from Delhi University in 2019, and three years later, in 2022, he and Tyagi got into the business of running PG accommodations in Satya Niketan. He has told the cops that there are several others like him who are operating such facilities in old buildings on lease.

A Delhi court Wednesday remanded Lovneesh and two others — building owner's son Mahesh Gupta (52) and contractor Sanoj — in two days in police custody. Mahesh was produced after his earlier two-day police remand ended. Police had sought three days' custody for all three to question them and confront them with the owner of the building, Hariram Gupta (81) who retired from IAF, and his wife, Urmila (75) who had been sent to 14 days in judicial custody Monday.

Contractor Sanoj has told the cops that the basement was getting flooded with rainwater for 8 to 10 days and, in an unconventional solution, had been filled with three truckloads of construction debris to bring it up to the level of the ground floor.

Police Wednesday confirmed **TOI**'s report that the building collapsed like a pack of cards because a retaining wall on the ground floor was removed to merge two shops. Four additional floors had already been built on a weak foundation and the removal of the wall was the last straw.

Sanoj told the police that he had been engaged for the work by Mahesh Gupta around 10 days before the incident and was being paid Rs 2,800 per day. He had been apprehended from Kasganj in UP on Tuesday. The labourers engaged in the work were being paid Rs 800 daily and they too are being questioned.

Police sources said Lovneesh had reached the spot soon after the building collapsed but fled after students began to point him out as the operator of the PG. He then rushed to a friend's house in Burari, from where the police have nabbed him.

The proceedings for remand of Lovneesh, Mahesh Gupta and Sanoj in the court of judicial magistrate Kautuk Bharadwaj were held in camera after the counsel for Lovneesh said the case was at a nascent stage and a "media trial" would prejudice the ongoing probe. The magistrate then directed the media personnel to leave the courtroom.

Minor sexually abused by school cab driver

New Delhi: A four-year-old girl has accused her school-cab driver of sexually abusing her in west Delhi's Ranhola, following which police registered a case under the Protection of Children from Sexual Offences (Pocso) Act.

Investigators said the accused is absconding, and efforts are underway to trace him.

According to police, the matter came to light after the child repeatedly refused to go to school. Her mother, concerned by the change in her behaviour, spoke to her, following which the girl allegedly disclosed that the cab driver had touched her inappropriately. The family lodged a police complaint. The child was then taken for a medical examination.

Police said statements are being recorded and details of the school's transport arrangements are also being verified.

Recently, a similar case was reported in outer Delhi's Bawana, where a three-year-old girl was allegedly sexually assaulted by a school-cab driver. Police had arrested the accused in that case. TNN

Raids Find Slaked Lime Used To Whiten Paneer

▶ Continued from P1

Daily, synthetic paneer is delivered in bulk to distributors, mandis and catering kitchens associated with banquet halls. On the plate, it comes packed into *tikkas* and stuffed in patties, *kulchas*, rolls and parathas, and in curries.

Synthetic paneer (also analogue or non-dairy) is everywhere. Gondola is among its chief contributors. Last month, Haryana govt banned all forms of non-dairy paneer after finding their presence in a large number of samples tested at labs. But the units that bulk-produce paneer doppelgangers continue to churn out massive batches as orders flow in. The only difference? Gates are shut, and there's a watch posted outside.

"Food safety teams are active in the area," says Imran. At another unit in Punahana city, workers turned abusive when we inquired about paneer production.

Gondola specialises in all forms of synthetic paneer, like skimmed milk with palm oil and vegetable fats and soya paste treated mixed milk solids. Over the years, the demand for cheap paneer has seen manufacturing units proliferate beyond a single cluster to Katpuri, Punahana city, Bara Bazidpur in Pinangwan, Raniyala and Bodi Kothi in Ferozepur Jhirka and Sheikhpur in Nagina, among other places.

They produce quickly and do whatever it takes to make their product look the best. "During recent raids on paneer manufacturing units in Punahana, food safety officials found buckets of slaked lime (*chuna*) to artificially whiten synthetic paneer," said a food department source. A ballpark estimate of how much paneer the Gondola belt sends out daily, according to various officials and distributors these correspondents spoke to, is 10,000-12,000 kg.

Haryana food safety commissioner Manoj Kumar has issued a one-year statewide prohibition under Section 30 (2)(a) of Food Safety and Standards Act, 2006, covering analogue paneer, and barring its preparation using milk powder or vegetable oil. Officials have been told to seize stocks and initiate criminal prosecution under FSS Act.

Maharashtra, Chhattisgarh and Gujarat, too, have banned synthetic paneer for a year. Sale and production of analogue paneer is not illegal in India as long as it is correctly labelled, but concerns about poor standards and the impact on health have led to a rethink.

The state's latest testing data underlines the scale of the problem: of 285 paneer samples tested between April 1, 2025, and March 31, 2026, 200 failed to meet standards. In many samples, the Butyrorefractometer (which measures purity) readings and iodine values were significantly beyond limits, showing replacement of natural milk fat with non-milk vegetable fats.

Food delivery aggregator platforms are acting too. On Aug 31, Zomato announced a zero-tolerance policy on analogue dishes. It said restaurant partners have been asked to transition to natural dairy products, remove analogue-dairy items if an immediate switch isn't feasible, and review supplier product labels and ingredient declarations to ensure accurate menu representation.

"Thirteen paneer dairies have been proceeded against by the Nuh regional office. Of them, three units have been closed, closure orders have been received against five, four units are under show-cause notice, and closure recommendation against one has been sent to head office," Nuh deputy commissioner Akhil Pilani said.

Who Are The Buyers?

A supplier described an organised distribution network connecting Nuh's manufacturing units with Delhi-NCR's catering and food businesses. Vehicles, he said, leave early morning carrying "freshly prepared synthetic paneer" to Delhi, Gurgaon and surrounding areas. The economics make the case for it. A commercial buyer paying Rs 340 for a kilogram of full-cream paneer could procure the cheapest variety (soya paste and vegetable oils, perhaps with a chuna whitener) for Rs 120-150. For a catering order of 1,000kg, this is a savings of Rs 2 lakh.

Sources told **TOI** synthetic paneer is delivered to distributors at Khandsa Mandi, Subzi Mandi on Gurdwara Road, and Anaj Mandi in Gurgaon and at Janakpuri, Uttam Nagar, and in the east in Delhi, mostly for banquet halls, cloud kitchens and local dairy shops. Hapur, Palwal and Bhiwadi are other centres that produce synthetic paneer.

Chef Sunnyy Vyas, also known as Brown Chef India, said texture and taste can offer clues, though they're no substitute for lab testing. "After spending years in kitchens, you develop an instinct with ingredients," he said. Good, fresh paneer crumbles rather than stretching like cheese or rubber, he explained — it typically has a soft, slightly grainy, milky feel and a fresh, milky flavour, whereas analogue products can feel unusually smooth, tight or rubbery, and taste more elastic or processed.

But he cautioned this isn't foolproof. "Some products are made very well and can be difficult to identify without checking the ingredients or doing a proper test." His message for restaurants using analogue products was simple — transparency. "Analogue paneer should be mentioned clearly on the menu, preferably with the ingredients or what it is made from in brackets."

Is There A Health Impact?

Paediatric endocrinologist Dr Ganesh Jevalikar said the concern goes beyond analogue paneer simply being different from the dairy product. "Paneer is commonly consumed as an important source of protein, particularly by vegetarians, but analogue paneer can be deficient in protein because its preparation is fundamentally different and may rely on vegetable fats, palm oil, starches and emulsifiers," he said.

Regular consumption of products high in saturated fat, he added, could contribute to weight gain, obesity and increased LDL cholesterol, with longer-term risks, including insulin resistance and type 2 diabetes, particularly when eaten frequently. "The bigger issue is that a low-cost substitute should not be mistaken for a nutritionally equivalent food."

Surabhi Sharma, clinical nutritionist and dietetics at Max Hospital, Gurgaon, said, "The health impact depends on the formulation, serving size and frequency of consumption. Some analogue products can be higher in saturated fat, refined starch, calories and sodium, and lower in protein and calcium than dairy paneer. Consistently consuming them may result in poorer overall nutrition. There is no scientific proof that properly controlled analogue paneer causes hormonal imbalance, so there is no need for unnecessary panic."

Manpreet Singh, honorary treasurer of National Restaurant Association of India, said good restaurants don't serve analogue paneer because "that's against the grain of the business".

BEYOND PANEER: DAIRY THAT ISN'T

WHAT IS AN ANALOGUE DAIRY PRODUCT?

FSSAI uses the term for products in which non-dairy ingredients partly or wholly replace milk constituents, while the finished product is made to look, taste or behave like a conventional dairy product

WHERE ELSE IS DAIRY BEING REPLACED?

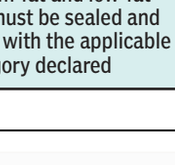

CHEESE

Vegetable oils, starch, emulsifiers and sometimes milk proteins are used to mimic processed cheese. It may not melt or stretch like real cheese

GHEE

Non-milk fats are engineered to replicate ghee's aroma, colour and cooking properties. The substitution matters because ghee is a premium product sold largely on perceptions of purity

CREAM

Vegetable-fat-based creamers can substitute for dairy cream. These products can be legally sold when clearly identified as non-dairy; the issue arises when they are passed off as fresh cream

KHOYA

Non-milk fats and other ingredients recreate khoya's dense, crumbly texture. Once incorporated into barfi, peda or gulab jamun, substitution can be difficult to detect

CHHENA

Non-dairy fats and proteins can be used to mimic chhena for sweets such as rasgulla and sandesh, where cooking can mask differences in texture

WHAT THE RULES SAY

1. Regular full-fat paneer must contain at least 50% milk fat on a dry-matter basis and can be sold loose
2. Medium-fat and low-fat paneer must be sealed and labelled, with the applicable fat category declared
3. Products using vegetable oil in place of milk fat cannot be sold as paneer and must clearly disclose the substitution

THE FIVE-TIER PANEER MARKET

- **₹340/kg** — Pure full-cream 'malai' paneer: Supplier-described as entirely milk-based; the premium variety
- **₹250/kg** — Skimmed milk + vegetable fat: Uses palm/vegetable fat to lower costs while retaining a fatty texture
- **₹200/kg** — Skimmed milk + milk powder
- **₹200/kg** — Soy + dairy hybrid: Roughly 50% soy and 50% dairy ingredients
- **₹120–150/kg** — 'Flavour soya'/'tikki': Cheapest variety, described as predominantly soy-based, with about 10% milk. Sold in compressed blocks

Durgabari, Kailash Colony, Delhi

Man gets 14 years in jail for hurling acid on wife

TIMES NEWS NETWORK

New Delhi: A court sentenced a man to 14 years' rigorous imprisonment for throwing acid on his wife, observing that the consequences of an acid attack extend beyond immediate physical injuries and can remain with the survivor for life.

Additional sessions judge Prayank Nayak also imposed a fine of Rs 1 lakh and directed that the amount would be given to the survivor as compensation. In default of payment, the convict will undergo an additional year's imprisonment. The court also directed Central District Legal Services Authority to determine and grant compensation to the woman in accordance with law.

The woman was attacked on Aug 8, 2022, when the couple were already living separately. She went to meet her husband and they had an altercation. After she returned home, around 5.30pm, the man came with acid and threw it at her. Her mother and a neighbour rushed her to hospital. She suffered extensive burns on her face and ear, while acid droplets also injured children playing nearby.

The accused was arrested two days later. The court convicted him under Section 326A (voluntarily causing grievous hurt, permanent or partial damage, deformity, or disfigurement by using acid) of IPC and awarded the sentence, considering the gravity of the offence, extent of injuries and their long-term impact.

Nod to separate engg cadre for Delhi PWD

New Delhi: Union govt has approved Delhi govt's proposal to create a separate engineering cadre for Public Works Department (PWD), bringing 3,214 sanctioned engineering posts out of CPWD cadre. Chief minister Rekha Gupta said the separate cadre would help expedite development works, strengthen the engineering system and ensure greater accountability and transparency. The 3,214 sanctioned posts span 36 categories in PWD's engineering wing. TNN

Ritual followed 'jihadi slogans': U'khand CM

Dehradun: Uttarakhand CM **Pushkar Singh Dhami** Wednesday said Congress had no evidence to establish that the alleged "purification" ritual held at Haldwani's Ramlila Ground was intended to insult any community or individual.

The ritual was conducted after "jihadi slogans were raised" at the venue during Congress president Mallikarjun Kharge's rally, Dhami added, using the term 'jihadi' for the first time — since the controversy broke — to describe the speeches given at the event.

"After jihadi slogans were raised, a social organisation carried out the purification of the venue. It was not directed against any individual. If someone tries to give it a different shape or political colour, then what can anyone do?" chief minister Dhami added.

— **Kautilya Singh**

PM pushes for one-login govt portal

▶Continued from P 1

The report said that govt portals are cluttered with pop-ups, flashing banners and scrolling text, to name a few. It had also said that several websites work poorly on mobile phones despite most Indians using the internet through mobile phones.

Recently, PM had directed the electronics and IT ministry to expedite the "Ek Bharat" portal, a unified service delivery platform for citizens which will require people to access all govt websites with just one username and password.

TOI has learned that many saw the PM's advice to ministers about being assertive to counter a negative campaign as a reference to "naaraz fufa". Sources said govt has achievements to highlight to effectively counter negative narratives.

'Rahul mian' can't grasp Vande importance: Nabin

TIMES NEWS NETWORK

New Delhi: A day after Congress took exception to J&K CM Omar Abdullah and his father Farooq Abdullah standing during the full rendition of Vande Mataram, BJP on Wednesday attacked Congress leader Rahul Gandhi for opposing the full version of the national song and dubbed him "Rahul mian".

BJP president Nitin Nabin targeted the main opposition party at a presser in Delhi and stepped up his attack at a BJP event in Haldwani in Uttarakhand. BJP has said Congress's stand is driven by its appeasement of Muslim voters, a section of which considers Vande Mataram idolatrous in violation of their religious beliefs.

Congress general secretary K C Venugopal Tuesday said on social media, "With respect and humility, we would like our allies to honour the wisdom and judgement of our freedom fighters, and stand with us in singing only the version of this beautiful and historic song that they adopted. That version was chosen deliberately, to keep the song from being communalised-a threat as real today as it was then."

Blaming Rahul for Congress's stand on Vande Mataram, Nabin said Rahul cannot appreciate the national song's significance as he was raised in a "foreign culture".

Nitin Nabin said an 'anti-national and anarchic' mindset is driving the main opposition party

He is unable to grasp the importance of Indian culture, the BJP chief alleged.

Such a Congress must be brought to an end, he told BJP members, ruing that a song that inspired freedom fighters to make the ultimate sacrifice makes the opposition party and its former president Sonia Gandhi feel "embarrassed". It was a reference to Sonia gesturing to Congress members at an Independence Day event at the party's office when the song was being played in full.

Nabin said an "anti-national and anarchic" mindset is driving Congress. BJP said the Srinagar event has confirmed Congress' isolation within its own alliance and its emergence as the new Muslim League.

The song has become a symbol of the honour and unity of nation, he asserted.

Constitutional obligation: NC on Vande row

▶Continued from P 1

National symbols, songs and traditions occupy a special place in the heart of every Indian. Their true strength lies in their ability to bind together a nation as diverse as ours," Jammu & Kashmir Congress president Tariq Hamid Karra said, calling it a concern that alliance partners had chosen to sing the full version.

National Conference countered, asking Congress to look at CMs of states governed by the party, including Telangana and Karnataka, who have participated in full renditions.

Party chief spokesperson Tanvir Sadiq shared on X a video featuring Karnataka CM DK Shivakumar at an event where the unabridged song was sung. He said govt protocol must be separated from party ideology. "When Parliament has adopted it, playing Vande Mataram becomes a statutory obligation and that is what govt did," Sadiq said. NC's Imran Nabi Dar said: "This is a constitutional obligation, and every one holding a constitutional office has to accept it, whether it is the CM, an MP or anyone else," he said.

Centre should go back to drawing board if law has a problem, says SC

▶Continued from P 1

With a bunch of petitions challenging the constitutional validity of this exception to rape, a bench of Chief Justice of India Surya Kant, and Justices Joymalya Bagchi and V Mohana said the matter posed foundational questions, especially citing the case in which a husband has challenged a Karnataka high court decision to permit his prosecution for marital rape.

The hearing saw Solicitor General Tushar Mehta arguing that the issue, given its complexity, be left for the Parliament to consider.

It will be absurd for courts to take upon themselves the task of determining the nature of sex — natural or unnatural — when it is best left to people, their representatives and legislature, SG Tushar Mehta said.

The bench agreed. "It should always come from Parliament. If the govt feels there is a problem with the law, then it should go back to the drawing board and recast the law with approval of Parliament," it said.

During the last hearing, SC had wondered whether the court can rewrite penal laws to create a new offence.

Senior advocate Karuna Nundy said that no new offence needs to be created as the offence of rape is already defined and the only question is whether it is constitutionally justified to grant immunity from it to a class of persons (husbands).

Cannot predict outcome of declaration: Russian minister

▶Continued from P 1

Russian deputy foreign minister Sergey Ryabkov told TASS that some members were sharply critical of Tehran's actions, making the Gulf situation Brics' most pressing political issue. "And as of today, I cannot predict what the outcome will be," he said about negotiations on the final document.

Kremlin spokesman Dmitry Peskov acknowledged that Iran–UAE differences complicated drafting, but expressed confidence that diplomats would find acceptable wording.

The disagreement concerns what members want Brics to say about the conflict. Iran's Mehr agency reported its judiciary chief's call at a preparatory meeting for condemnation of US–Israeli attacks. UAE agency WAM highlighted Emirati criticism of Iranian attacks on commercial shipping and demands to reopen the Strait of Hormuz.

Chinese commentary has focused on India's economic strengths. A Global Times article carried by People's Daily praised its strengths in digital tech and medicine, while saying that bridging differences among members would test Indian diplomacy.

Another Global Times commentary advocated deeper India–China trade and greater Chinese market access for Indian products. Indian reporting has highlighted New Delhi's concerns about Chinese restrictions on critical technologies and industrial components.

In Brazil, CNN Brasil reported that President **Luiz Inacio Lula da Silva** would prioritise poll campaigning and send foreign minister Mauro Vieira. South Africa's Business Day questioned whether expansion had weakened Brics' unity, while broadcaster SABC highlighted Pretoria's push for trade, industrialisation and African infra investment.

For India, success would mean reaching useful agreements on specific issues while negotiating a common political message among partners whose interests do not always coincide.

Vande Mataram row erupts in Guj assembly

A Vande Mataram row erupted in Gujarat assembly Wednesday after BJP accused Congress MLA Imran Khedawala of disrespecting the national song by sitting down before its full rendition ended. Vejalpur MLA Amit Thaker said: "Khedawala has insulted Vande Mataram." TNN

WINGS OF AMBITION

READER ENGAGEMENT INITIATIVE

India's widening wingspan

As aerospace, defence, and civil aviation become more interconnected, India is laying the foundation for a broader industrial transformation

Artha.Neog@timesofindia.com

India's defence, aerospace, and civil aviation sectors have undergone significant transformation in recent years, reflecting the country's growing industrial capabilities and expanding global footprint. Indian-made defence equipment is now reaching more than 80 countries worldwide, generating export revenues of over ₹38,000 crore.

This progress reflects years of sustained effort. Government support for domestic manufacturing, together with incentives for private companies, has helped expand and strengthen India's defence industrial base. It has also encouraged greater participation, innovation, and investment across the sector. As a result, Indian defence exports are reaching a diverse range of markets, where cost-effectiveness, ease of maintenance and reliable after-sales support make the equipment an appealing choice.

This export growth is being fuelled by a growing and increasingly capable aerospace ecosystem. While India's aerospace journey began with a few flagship programmes, the sector has since expanded to include a much wider network of supporting industries. Hundreds of small and medium-sized manufacturers now produce components and sub-assemblies for both military and commercial aircraft, with some feeding into global supply chains. This growth has been accompanied by greater investment in testing facilities, skilled engineering talent and stronger partnerships between Indian firms and international manufacturers seeking to build and source locally.

Indian-made defence equipment is now reaching over 80 countries, generating export revenues north of ₹38,000 crore

While defence tells a story of India selling to the world, civil aviation tells a story of the nation opening up to itself. India has become the world's third-largest domestic aviation market, a distinction that would have seemed almost fanciful a decade ago, when the country had barely 70 functioning airports.

AI IMAGE

That expansion has been driven by a combination of factors, including new and modernised airports, expanding airline fleets, more competitive fares and a growing middle class with both the means and appetite to fly.

Towns that once had limited air connectivity are now part of a growing aviation network. The impact extends beyond travel convenience, as greater air connectivity can also support local tourism, trade and investment in the regions it reaches.

Taken together, these developments point to a broader shift in India's industrial landscape. A stronger defence industrial base supports aerospace expertise; aerospace expertise strengthens the wider manufacturing ecosystem; and a growing aviation market creates fresh demand and infrastructure that, in turn, feed back into that ecosystem.

The result is an increasingly integrated ecosystem in which domestic capability, export potential and growing demand reinforce one another, creating new opportunities across sectors, industries, regions and global markets. This momentum is strengthening India's capabilities and global competitiveness.

As Credit Growth Broadens, Banks Show Healthy Offtake

Banks are regaining credit momentum, dominating incremental lending across sectors as infrastructure, industry and real estate demand strengthen, while NBFCs remain retail-focused

Source: RBI, Bank of Baroda Research, Note: Share of Banks is calculated as incremental credit to Bank/(Incremental Credit to Bank+NBFC)

Adani Airports to raise $1bn equity from global investors

Co Valued At $18Bn, One Of Largest Bets From FIs In Sector

TIMES NEWS NETWORK

New Delhi: India's largest private airport operator — Adani Airport Holdings (AAHL) — has entered into binding agreements to raise Rs 9,825 crore (about $1 billion) of primary equity capital from a consortium of investors, comprising Alpha Wave Global, Premji Invest, Temasek and BlackRock managed funds. The transaction values AAHL at about $18 billion and is one of the largest primary equity investments from financial institutions in India's airport infrastructure sector.

AAHL and the investors have entered into a share subscription agreement and a shareholders' agreement pursuant to which the investors will subscribe to new equity shares of AAHL in three tranches, with the final tranche expected to be completed by July 2027. Investors will collectively hold over 5.5% in AAHL. The latest transaction follows AEL's successful Rs 15,000 crore QIP in July 2026.

The company said these proceeds will support three strategic priorities — expanding and modernising airport infrastructure across AAHL's portfolio; accelerating the development of integrated Adani airport city ecosystems around its airports with development of about 2.2 crore square feet of mixed-use development planned in the first phase; and scaling up of passenger-facing and other non-aeronautical businesses, including its ground handling business.

AAHL manages eight airports across India — Mumbai, Navi Mumbai, Ahmedabad, Jaipur, Lucknow, Guwahati, Mangaluru and Thiruvananthapuram — handling over 23% of India's total passenger traffic. "These investments are expected to increase capacity to serve 20 crore passengers annually, deepen commercial monetisation, enhance passenger experience and further strengthen AAHL's integrated airport ecosystem," AAHL, a subsidiary of Adani Enterprises (AEL), said in a statement.

AAHL non-executive director Jeet Adani said: "With the backing of these partners, we will continue to invest ahead of that growth, scaling our infrastructure, city-side developments and non-aeronautical businesses to build one of the world's leading integrated airport platforms."

LOOKING TO EXPAND & MODERNISE

Consortium of investors includes Alpha Wave Global, Premji Invest, Temasek and BlackRock

Proceeds will support three strategic priorities:

A) Expansion and modernisation of airport infrastructure across Adani Airport Holdings' portfolio

B) Accelerating development of integrated Adani airport city ecosystems around airports

C) Scaling up of passenger-facing and other non-aeronautical businesses, including ground handling business

AAHL manages eight airports across India and handles over **23% of India's total passenger traffic**

NSE cuts IPO size, may raise ₹23.5k cr

TIMES NEWS NETWORK

Mumbai: IPO-bound National Stock Exchange (NSE), the largest stock exchange in India by turnover and profits, is reducing the size of its offering to about 5.3% of its equity base, from 6% planned earlier. The stocks will be offered in a price band of Rs 1,700 to Rs 1,785 per share, people in the know said.

In effect, the reduced size and also the price band would together cut the offer size to about Rs 23,500 crore. Earlier, NSE's IPO was expected to raise about Rs 30,000 crore, which would have made it the largest current public listing in India.

According to people in the know, even during pre-IPO days when NSE management was persuading its shareholders to offer their shares in the IPO, very few were willing to sell their stakes in the offer. They were willing to hold on to the shares, see the post-IPO price on the bourse and once the lock-in was to end, decide about their holdings, a source said.

At the upper end of the reduced price band, NSE would be valued at about Rs 4.4 lakh crore, down from an earlier estimate of about Rs 5 lakh crore.

On Sept 4, markets regulator Sebi cleared NSE's IPO documents. Earlier, existing shareholders together were selling nearly 15 crore shares, which is now being reduced to about 13.2 crore shares. Market participants said the offer would be launched "as soon as possible". And according to merchant banking sources, the offer could open as soon as Sept 16.

Currently, in the unofficial space for trading of shares, NSE is quoting between Rs 1,950 and Rs 2,050. In the same market, the grey market premium (GMP)—the estimated premium that the share could command at listing—has been fluctuating over the last few days.

₹1.7K PRICE BAND

- At the upper end of the reduced price band, **NSE will be valued at about ₹4.4L crore**
- The stock is likely to be offered in a **price band of ₹1,700-1,785 per share**
- Existing shareholders are likely to **sell a combined 13.2 crore shares** as against the earlier 15 crore shares they were expected to offload

Skoda Auto, JSW sign MoU to explore PV joint venture

TIMES NEWS NETWORK

New Delhi: Skoda Auto and JSW Green Mobility have signed a non-binding agreement to explore a joint venture that could develop, manufacture and sell passenger vehicles in India and overseas, the companies announced on Wednesday. The proposed partnership will span internal combustion engine vehicles, electric vehicles, plug-in hybrids and hybrids, signalling that the discussions extend beyond an electric mobility alliance.

"At this stage, the MoU is exploratory and non-binding. The two companies are in early discussions, and there is no definitive agreement yet," a JSW Group spokesperson said. Any binding arrangement will require further negotiations, internal approvals and regulatory clearances, the spokesperson added. The companies did not disclose the proposed investment, shareholding structure or timelines for concluding the negotiations.

Skoda Auto, which leads Volkswagen Group's operations in India, said the proposed two-party partnership would have joint control, with clearly defined responsibilities and mechanisms for faster decision-making.

The collaboration is expected to focus on widening the product portfolio, increasing localisation and strengthening manufacturing and research and development capabilities in India. Platform synergies and deeper localisation are also expected to help the companies offer more competitively priced vehicles, build scale and improve profitability. "To fully explore the country's growth potential, we are always considering new business opportunities," the spokesperson said.

With iPhone Duo, Apple makes entry into foldable mkt

Takes On Samsung, Google | Launches iPhone 18 Pro Series

Aabhas.Sharma
@timesofindia.com

New Delhi: Apple on Wednesday entered the foldable smartphone market with iPhone Duo, priced at Rs 2,99,900, taking on Samsung, Google and Chinese brands in a category it had stayed away from even as rivals spent years refining the form factor.

The book-style device has a 5.5-inch outer screen and unfolds into a 7.8-inch display, effectively turning the phone into a small tablet. It supports side-by-side apps, enhanced multi-tasking and the Apple Pencil, while Touch ID returns through the power button, instead of Face ID. iPhone Duo pre-orders open in India on Oct 16, with retail availability beginning on Oct 23.

Apple also launched the iPhone 18 Pro and Pro Max at Rs 1,64,900 and Rs 1,79,900, respectively. Pre-orders in India begin Sept 12, with sales starting Sept 18. Both models are available with up to 2TB storage.

Their headline upgrade is a 48MP main camera with variable aperture, allowing users to control depth of field and light intake. Apple has added manual controls for aperture, shutter speed and white balance, along with reference image, a feature that records signed sensor data to help establish whether a photograph has been altered.

The phones use the 2-nanometre A20 Pro chip and a larger vapour chamber for thermal management. Apple claims up to 40% faster graphics performance, though real-world gains will require independent testing. The company promises up to 36 hours of video playback on the Pro and 45 hours on the Pro Max for eSIM-only variants.

Siri AI, arriving in beta with iOS 27, can use information from messages, emails and photographs to answer questions and perform tasks. However, availability will initially vary by language and region, while some cloud-based AI functions will carry daily usage limits.

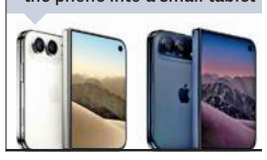

Apple also unveiled Watch Ultra 4 at Rs 1,09,900. It adds a readiness score, more frequent heart-rate and HRV measurements, and battery life of up to 50 hours. Its audio intelligence features will arrive in beta later this year.

JOINING THE FOLD

Apple's iPhone 18 Pro and Pro Max are priced at ₹ 1,64,900 and ₹ 1,79,900 respectively

Pre-orders in India begin Sept 12, with sales starting Sept 18

- Both models are available with up to 2TB storage
- Book-style foldable device has a 5.5-inch outer screen and unfolds into a 7.8-inch display, effectively turning the phone into a small tablet

Sebi lifts ban on JPMorgan unit, broker in CAS case

Markets regulator Sebi has lifted a trading ban on a JPMorgan Chase & Co unit and Mansi Share and Stock Broking over alleged manipulation of the closing auction session after the firms deposited a combined Rs 3.7 crore, two persons familiar with the matter said on Wednesday.

Securities and Exchange Board of India last month banned the two firms from the market, alleging they manipulated trades in a newly launched closing-auction mechanism used to determine the final official price of securities at the end of a trading day. Copthall Mauritius Investment, a JPMorgan entity, remains barred from participating in the closing auction session pending the outcome of the investigation.

Copthall Mauritius Investment, the JPMorgan entity, however, remains barred from closing auction session

Sebi, JPMorgan and Mansi Share and Stock Broking did not immediately respond to requests for comment. Launched on Aug 3, the closing auction is a roughly 20-minute auction during which buy and sell orders are matched to determine a stock's official closing price.

While similar systems exist in other markets, the mechanism's first month in India saw sharp swings in derivatives prices.

Last month, the regulator alleged that aggressive buy orders placed by Copthall and large sell orders by Mansi during the closing auction distorted the prices of stocks in the sensex. REUTERS

MITCHELL SANTNER TURNS DOWN BBL DEAL TO FOCUS ON NEW ZEALAND SCHEDULE

THIBAUT COURTOIS GIVEN GREEN LIGHT TO SKIP BELGIUM'S NATIONS LEAGUE CAMPAIGN

BEN THERE, DONE THAT!

Shelton Dethrones Defending Champ Alcaraz In Epic QF Ending After 3:30 AM; Tiafoe Beats Michelsen To Set Up All-American Semifinal...

Pix: AP, Getty Images

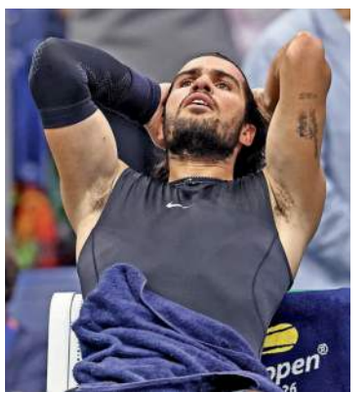

"I'M TIRED. THAT WAS A WAR, AN EPIC MATCH, VERY PHYSICAL. BUT, YEAH, THE MOST ENJOYABLE MATCH THAT I'VE HAD IN MY CAREER, FOR SURE." —Ben Shelton

9 After narrowly losing the first set, Shelton won nine consecutive games across the second and third sets.

THRILLER NIGHT: Ben Shelton (top) celebrates his win as Alcaraz (left) wonders what went wrong

THE TIMES OF INDIA AT US OPEN

Prajwal.Hegde@timesofindia.com

New York City: Carlos Alcaraz left New York with a smile. He had reasons to be pleased. He raced around Arthur Ashe, powering winners and putting his maverick brand of tennis on display for a home crowd that had stayed until almost 4 am. But as good as the seven-time major winner was on Tuesday, playing his first tournament since mid-April, this was Ben Shelton's night, or morning.

The left-hander, serving at speeds of up to 149 mph, shocked the defending champion in five sets — 6-7 (5), 6-1, 6-3, 1-6, 7-6 (10-7) — in the US Open quarterfinals, completing the upset in four hours and 28 minutes. The clock stopped at 3:33 am, the latest finish for a match at Flushing Meadows.

Shelton, 0-17 against the top three coming into the last-eight clash, held his nerve to score the biggest win of his career. The 23-year-old finished with a 146 mph cannon and swiftly brought back his phone celebration, signalling that he was dialled in. "For me it is always about the people and the crowd, the city of New York that showed up tonight till 3 am with USA chants until the very end. That's what kept me going," he said in his on-court interview.

After Alcaraz took the first set, he was expected to run with the match. That was the script. Only Shelton was furious that he had lost the opening set. First he was broken in the 11th game, then he led for most of the first-set tie-break, 3-1 and 5-3, before the Spaniard ripped off four successive points to claim the early advantage.

That reversal only fuelled Shelton's hope and fury. Angry at letting the set slip, he took confidence from the fact that he had broken Alcaraz to force the tie-break. Perhaps that was where the match turned, in the head.

With constant reinforcements from dad Bryan Shelton, the world No. 9 broke the defending champion three times in succession to run away with the second set. "Once I got rolling in the second set, it was a lot easier to just play and swing more freely," he said.

Alcaraz was back in full flight in the fourth set, save for some crucial miles missing from his serve, which has been a feature of his run here. When he won the US Open last year, his average first-serve speed was 122 mph. This year, it was 114.

The American constantly attacked Alcaraz's serve and it didn't help that the Spaniard began to wane physically in the third set, throwing up into his towel. The second seed hit back in the fourth set to level the match, but Shelton's serve was stinging in the match tie-break. He came back from 3-5, got the mini-break to go up 8-6 and never looked back.

In the end, there was little to separate the two men, not even their gear, both dressed in black ombre. A mere five points in the total count. "That was a war, epic match, so physical," Shelton said, adding, "The most enjoyable match that I've had in my career."

Alcaraz, who was on an 18-match winning streak in Grand Slams, applauded the winner, calling him a beast. "I'm not going to be disappointed about not getting the win, I leave the court with a smile, healthy, and this is what I needed. I'm just proud about myself, about how I fought," he said.

Tiafoe fights back

Earlier, after four hours and 38 minutes of an electric contest, Alex Michelsen collapsed into Tiafoe's arms and sobbed. The older man, the winner of the quarterfinal clash, had cut short his celebrations and rushed over to console the 22-year-old, who had been in the run of his young life at the US Open.

For a moment, even Arthur Ashe Stadium, which had been firmly behind Tiafoe, seemed to fall silent. Perhaps because this was the kind of contest no man should have had to lose. But it lasted only a moment. There are no draws in tennis. Michelsen, the world No. 46, led by two sets to love and a break in the third. He even served for the match. But he could not close out the evening. Not in the third set, and not again in the fifth, when he led 3-0.

"I wasn't saying much," Michelsen said of Tiafoe's embrace. "He said, you'll be there, when I'm older, you're going to be here, and we're going it play again in this type of circumstance."

"I really like Alex. I really, really do," Tiafoe responded. The story that unfolded at Flushing Meadows was not merely about one man being unable to shut the door. It was equally about Tiafoe, the 11th seed, refusing to let go.

Tiafoe, who hit 10 aces to Michelsen's 21 and 50 winners to his 55, staged a spirited comeback to win 5-7, 3-6, 7-5, 6-3, 7-6 (10-6), sealing the victory with his 21st forehand winner.

RESULTS (QUARTERFINALS)
Men: Frances Tiafoe (USA x11) bt Alex Michelsen (USA) 5-7, 3-6, 7-5, 6-3, 7-6 (10/6); Ben Shelton (USA x8) bt Carlos Alcaraz (ESP x2) 6-7 (5/7), 6-1, 6-3, 1-6, 7-6 (10/7).
Women: Aryna Sabalenka (BLR x1) bt Linda Nosková (CZE x6) 7-6 (7/1), 3-6, 7-6 (10/7); Jessica Pegula (USA x3) bt Emma Navarro (USA x26) 3-6, 6-4, 6-3

Maaya's loss ends India's junior singles challenge

Prajwal.Hegde
@timesofindia.com

New York City: India's Maaya Rajeshwaran Revathi, the 15th seed, saved four match points after fighting back from a set and a break down in the decider, but could not complete the comeback, going down 3-6, 7-5, 5-7 to Russian qualifier Arina Malygina in two hours and 16 minutes in the US Open girls' singles second round.

Malygina, ranked 104, has an unorthodox game. The 18-year-old uses a generous dose of underspin from the back of the court, chipping her returns and taking pace off the ball whenever the rallies pick up, before suddenly producing some clean ball-striking of her own.

Maaya, 17, doesn't hold back. She likes to go for her shots, a strategy that is likely to pay off when she plays the pros, but in the juniors there is always the risk that the error count keeps climbing.

On Tuesday, Maaya was clocking upwards of 110 mph on her first serve for most of the match, but also had 10 double faults. She fought back from 1-3 and 3-5 in the third set, with all five of Malygina's match points coming on Maaya's serve, two in the 10th game and three in the 12th.

"I felt like my level dropped today. She played great, I don't want to take anything away from her. She found ways to win the match," Maaya said. "She played important points better than me. It was a very close match and whoever managed to handle that situation better would come through, she did that better than me."

She added, "I should have gone for my serves in the third set, the speed dropped to 95 mph in some games."

Meanwhile in the boys doubles, India's Arnav Paparkar and Thailand's Kunanan Pantaratorn fell to American Safir Azam and Kazakhstan's Damir Zhalgasbay 4-6, 2-6.

Sabalenka keeps three-peat dream alive

Prajwal.Hegde@timesofindia.com

SABALENKA

New York City: Aryna Sabalenka shook her head a couple of times as she prepared to serve in the seventh game of the decider, trailing 2-4 in the quarterfinals against Wimbledon champion Linda Noskova. The world No.1 didn't explode. There was no shouting or ranting at her box. In fact, she barely looked their way when things got tight. She simply kept going through the two-hour, 22-minute encounter.

The temperamental Belarusian, who could lose her No.1 ranking at the end of this week even if she wins the tournament, turned inward. She focused on the job at hand and came through 7-6 (1), 3-6, 7-6 (10-7), extending her winning streak at Flushing Meadows to 18 matches.

She is now two wins away from becoming the first woman to win three consecutive titles in New York since Serena Williams from 2012 to 2014. Sabalenka weathered a Noskova storm of 46 winners, including 18 aces. The 28-year-old answered with 42 winners and 12 aces, closing out with her first match point on a second-serve ace.

"I felt at some point in the third set she was definitely serving better than me and putting so much pressure on me, but I'm glad that I threw that thought away and was able to focus point by point and, literally just trying to build something bigger in that moment," she said.

At 6ft, Sabalenka has a monstrous game that matches her personality. The 28-year-old can be warm and outgoing but her on-court rants, battles with the crowd and occasional failure to give opponents their due have also put her under the microscope.

But on Tuesday, she shelved all that aside. "I was just focused on myself," she said. "For me, it's just funny to see how people are judging someone, guessing, doubting, coming up with random theories about someone. It's just been funny to see how people are crazy about someone else."

And with the noise around her only getting louder, Sabalenka knows what is at stake. "I'm super happy that I put myself in the position where I have chance to go for three-peat," she said. "It's really important to shut down all of the noise."

In the semifinals on Thursday, Sabalenka will play Jessica Pegula, who rallied for a 3-6, 6-4, 6-3 win over Emma Navarro.

IOA forms panel to investigate Lakra's charges

Arnab.Seal@timesofindia.com

Kolkata: Indian Olympic Association (IOA) president PT Usha's decision to form an inquiry committee to examine former women's hockey captain Asunta Lakra's complaint has been welcomed by Hockey India (HI) executive board member and vice-president Asima Ali, who called for "strict action" against those found responsible.

"It's a great step. I'm very happy with what PT Usha has done. It should have been done earlier, but at least they have done it now. Strict and immediate action should be taken against the culprits," Ali said.

In a letter dated Sept 7, IOA informed HI that it had constituted the committee following the federation's request to the sports ministry on July 15 and the ministry's subsequent request to IOA on July 16.

The committee will be chaired by retired Justice Deepa Sharma with Vandana Rao, Mamta Kharb and Sitwat Nabi as members.

'If I execute well, the arrow will be a 10'

Compound Archer Jyothi Not Dwelling On The Pressure Of Expectations

Sabi.Hussain
@timesofindia.com

New Delhi: For **Jyothi Surekha Vennam**, the mantra ahead of the Asian Games is deceptively simple: perfect the process and let the scoreboard take care of itself. India's No. 1 women's compound archer and a major medal hope, Jyothi will arrive in Aichi-Nagoya for her remarkable fourth Asian Games appearance. At Hangzhou in 2023, she produced a golden sweep, winning gold in the individual, women's team and mixed team events.

The 30-year-old told **TOI** that her emphasis was on executing each shot cleanly rather than dwelling on expectations. "Right now, I am just focused on myself and on shooting my best. This is the mindset I am going with," she said, adding, "I'm not chasing results or scores. I know that if I execute my shot really well, the arrow will for sure be a 10."

Jyothi will spearhead a new-look trio featuring Chikitha Taniparthi and Prithika Pradeep, with the team having competed together at World Cups. She is also set to compete in the individual, women's team and mixed team events, placing her at the heart of India's campaign.

At SAI Sonipat, phase two of the national camp has involved archery-specific physical work, two daily practice sessions plus psychology, physiotherapy and gym work. The squad leaves for Japan on Friday and will train for 10 days there.

There is no dramatic technical overhaul. "I haven't made any changes to my equipment or myself," said Jyothi, who is supported by and training at the Inspire Institute of Sport (IIS).

Tilak shows his red-ball mettle

South Captain Scores 99 But East Zone Close In On Title

Diptayan.Hazra
@timesofindia.com

C Suresh Kumar

IN FORM: Tilak Varma bats in Chennai

Chennai: Tilak Varma was finally dismissed in this year's Duleep Trophy, falling agonisingly short of a second century. Despite being dismissed for 99, the South Zone captain's red-ball ambitions stay intact, even though his team is staring at a big loss against East at the MA Chidambaram Stadium.

Tilak, who had scored a century and a half-century in South Zone's semifinal win against North Zone without being dismissed, battled through the Chennai heat on Wednesday against a quality East Zone attack. He was the last man to fall — giving a return catch to offie Kounain Quraishi — as South were eventually bowled out for 336, conceding a massive 372-run first-innings lead.

DULEEP TROPHY

East, opting to bat again rather than send their bowlers back out, were 212-5 at stumps on Day Four, stretching their lead to 584.

For Tilak, however, the larger picture remained clear. The 23-year-old left-hander has made no secret about his desire to play Test cricket for India. "I always say to everyone that I want to play red-ball cricket for India, that's my biggest goal. As a kid, I thought I would play Test cricket first and then white-ball cricket. Red-ball cricket has always been my favourite, it's my 'A' game," Tilak said.

"Over the last five-six years, I have played a lot of white-ball cricket and become good at it. Red-ball cricket is still my favourite, but I am comfortable with both now," said Tilak.

Tilak resumed the day on 56 and immediately took the attack to Mohammed Shami (2-42), striking two boundaries in the opening over. He and Chama Milind took 44 runs from the nine overs of Shami and Mukesh Kumar's (3-62) combined first spell, putting them under pressure. Shami conceded 25 in his first four overs after giving away only 17 in 11 overs on Day 3.

Kishan breaks 16-year-old record: East's second innings saw Ishan Kishan continue his first-innings form with 80 off 98 balls, while Shikhar Mohan (52) also remained among the runs.

Ishan Kishan amassed 350 runs across both innings of the Duleep Trophy final, surpassing Dinesh Karthik's aggregate of 333 runs from the 2010 final to set a new record for the most runs in the tournament final.

Brief scores: East Zone 708 & 212-5 (I Kishan 80, S Mohan 52; Md Siraj 1-17) vs South Zone 336 (T Varma 99; M Kumar 3-62, Md Shami 2-42, M Quraishi 2-99).

RANA, REDDY DOUBTFUL FOR AFG SERIES; BUMRAH CALL ON THURSDAY

Arani.Basu@timesofindia.com

New Delhi: There are doubts over the fitness status of Harshit Rana and Nitish Kumar Reddy, with both unlikely to join the Indian team for the T20 series against Afghanistan in Delhi, **TOI** has learnt. Rana and Reddy, along with recovering star fast bowler Jasprit Bumrah, underwent match simulation tests at the Centre of Excellence (CoE) in Bengaluru on Wednesday. While Rana is all but ruled out, Reddy might still play a few games.

The India T20I team is scheduled to start training at the Arun Jaitley Stadium from Thursday for the T20I series.

"CoE wants to take a cautious approach before clearing the players. The players are clinically fit but they may require another 10-15 days to be match fit," BCCI sources said, adding, "Selectors will have a discussion with CoE and team management about the situation on Thursday morning. Bumrah's participation in the series and the Asian Games will also be discussed."

Dressage controversy rocks Asian Games campaign

Sabi.Hussain
@timesofindia.com

New Delhi: A fierce row has erupted in India's Asian Games dressage team over rider Hriday Chheda's allegations that a disputed veterinary report was used to engineer his removal from the squad and clear the way for reserve rider Anush Agarwalla.

What should have been a straightforward fitness assessment has turned into a full-blown selection storm, pitting competing veterinary opinions against each other.

The row has put the spotlight firmly on the Indian Olympic Association (IOA)-formed Equestrian Federation of India (EFI) ad-hoc committee's functioning.

At the centre of the controversy is Chheda's 19-year-old horse, Dono di Maggio. EFI told the PT Usha-run IOA that on Sept 7, German veterinarian Dr Grigorios Maleas — appointed by the equestrian federation — had found the horse "veterinarily unsound/lame" and, within hours, sought a Late Athlete Replacement (LAR), proposing Agarwalla and his horse combination 'Straight Horse Floriana' as replacements. EFI told the IOA that LAR window closes at 8 pm on Sept 10, after which no replacement can be made. **TOI** is in possession of all the relevant documents and communications.

TOI EXCLUSIVE

Chheda has launched a blistering counterattack, alleging that the request was based on an "engineered, manipulated vet report" and accusing EFI's ad-hoc panel of a conspiracy to secure what he described as a "backdoor entry" for Agarwalla and his horse into the team.

The timing, too, has become a flashpoint. Chheda alleges he was told by Lt Col Sandeep Dewan — member in charge of administration in EFI's ad-hoc committee — at 4:36 pm on Sept 7 that no replacement request had been sent. Yet EFI's LAR request to the IOA, according to the documents, had already gone out at 4:05 pm, 31 minutes prior.

EFI has stood by its position, saying Maleas examined the horses and that team veterinarian Dr Hasneyn Mirza concurred with his findings.

Three veterinarians personally hired by Chheda subsequently found Dono fit to compete. Dr Mir Ismail Jawad reported the horse sound in a straight line, with no clinically significant lameness. Dr Anna Endrikat found no clinical issue compromising competition fitness. Dr Eamon McLaughlin also declared the horse fit and challenged Maleas's findings.

The eight Indian team horses are in pre-export quarantine at Aachen, Germany, where the tests were conducted on Sept 6 and 7.

Hardik set for India 'A' stint before India return

Allrounder Named In Squad To Take On Aus 'A' In Puducherry

Gaurav.Gupta
@timesofindia.com

HARDIK

Mumbai: Senior allrounder Hardik Pandya has been named in the India 'A' squad for the three-match one-day series against Australia 'A' in Puducherry in Oct, subject to regaining full fitness, BCCI announced on Wednesday. The move means Pandya will also miss India's three-match ODI series against West Indies, beginning on Sept 27.

Pandya, sidelined since the end of IPL-2026 because of a quadricep injury followed by a shin problem, which saw him miss the three-match T20I series vs Afghanistan starting in New Delhi from Sept 13, has been undergoing rehabilitation at BCCI Centre of Excellence in Bengaluru. Sources told **TOI** that the 32-year-old has resumed bowling, averaging 7 overs daily, and is expected to be fully fit by Sept 21-22.

However, the selectors appear keen to assess Pandya's match readiness at India 'A' level before considering him for the senior side. With an ODI World Cup scheduled for Oct-Nov 2027, the team management wants him bowling a full quota of 10 overs regularly.

Ind 'A' multi-day squad: Devdutt Padikkal (C), Sai Sudharsan (VC), Aman Mokhade, Ayush Pandey, Yash Rathod, Shaik Rasheed, Kumar Kushagra (WK), Shams Mulani, Tanush Kotian, Tushar Deshpande, Anshul Kamboj, Praful Hinge, N Jagadeesan (WK), Nachiket Bhute, V Vyshak.

Ind 'A' one-day squad: Ruturaj Gaikwad (C), Devdutt Padikkal (VC), P Arya, S Sudharsan, Rajat Patidar, Kumar Kushagra (WK), Nishant Sindhu, Vipraj Nigam, Arshin Kulkarni, Arshad Khan, Naman Dhir, Hardik Pandya, Prabhsimran Singh (WK), Gurjapneet Singh, Yash Thakur.

India face Bangladesh test in semis today

Gaurav.Gupta
@timesofindia.com

HARMANPREET

Seven-time champions India will start as overwhelming favourites against a gritty Bangladesh in the first semifinal of the 2026 Women's Asia Cup at the Dubai International Cricket Stadium on Thursday.

WOMEN'S ASIA CUP

Beyond the on-field contest, India-Bangladesh cricket ties continue to carry a political backdrop. Ever since the regime change in Bangladesh a couple of years ago, relations between New Delhi and Dhaka have been strained.

The impact has spilled into cricket. The BCCI withdrew Bangladesh left-arm pacer Mustafizur Rahman, signed by Kolkata Knight Riders, from IPL 2026.

Bangladesh subsequently pulled out of the 2026 men's T20 World Cup in India, while India's white-ball tour of Bangladesh has been postponed repeatedly amid the political tensions.

India have been the standout side of the tournament, topping Group A with three wins from three matches. Harmanpreet Kaur's side will be keen to reclaim the continental crown after losing last year's final to Sri Lanka in Colombo.

The biggest highlight of India's campaign has been vice-captain Smriti Mandhana's blazing 124 off 64 balls against Hong Kong. During that knock, she surpassed former skipper Mithali Raj to become the leading run-scorer in women's international cricket across formats. India's spinners also dismantled Pakistan for just 55 before sealing a seven-wicket win inside nine overs. Alongside Mandhana, Shafali Verma has continued her explosive form.

Baroda, J&K on AGM blacklist as BCCI bars seven units

Mumbai: Seven state cricket associations, including reigning Ranji Trophy champions Jammu & Kashmir, Baroda and Hyderabad, have been barred from attending the BCCI's annual general meeting (AGM) at the board headquarters in Mumbai on Sept 18, **reports Gaurav Gupta**. The decision was taken by BCCI election officer AK Joti, leaving only 29 of the board's 36 member units eligible to participate. Also excluded are cricket associations of Chandigarh, Meghalaya, Arunachal Pradesh and Bihar. Several former India cricketers will attend the AGM as representatives of their respective state associations.

Pak collapse to 133 all out against England in 3rd Test

Birmingham: England lost two early wickets but remained in control after their pace attack demolished Pakistan for 133 on the opening day of the third and final Test at Edgbaston. Josh Tongue took 4/42 while opening duo Ollie Robinson and Jofra Archer claimed 3 wickets each. At the end of Day One, England were batting at 156/4. AGENCIES

JAMES BOND SCREENWRITER CONFIRMS 007 HAS ALREADY BEEN CAST, AND 'SLOW HORSES' STAR JACK LOWDEN IS FRONT-RUNNER

OpenAI says it solved 90-yr-old maths problem in 88 hrs

Navier-Stokes is one of the seven Millennium Prize Problems, a list of the hardest open questions in maths. It concerns the equations describing how fluids such as air and water move, which are used in aircraft design, weather forecasting and the study of blood flow

OpenAI said Tuesday that one of its unreleased artificial intelligence models had solved a mathematical puzzle that has eluded mathematicians for generations, in a claim which also drew a fight with rival researchers over credit. Researchers at OpenAI said it took just days — and millions of dollars in computing power — to crack what is known as the Navier-Stokes problem.

Navier-Stokes is one of the seven Millennium Prize Problems, a list of the hardest open questions in mathematics drawn up by the Clay Mathematics Institute. It concerns the equations describing how fluids such as air and water move, which are used in aircraft design, weather forecasting and the study of blood flow.

In a blog post describing the breakthrough, OpenAI said it began training a new model in late Aug, more capable than anything it had released publicly. Days later, seeing online rumours that a competitor had solved Millennium problems, OpenAI turned the system loose on all six that remain open. Work on Navier-Stokes showed unexpected promise, and the company poured its computing power into it.

By the final stage, OpenAI researcher Sebastien Bubeck said, 10,000 AI agents — programs that operate on their own — were working on the problem at once, passing messages back and forth. Chen said the computing costs ran "emphatically in the millions of dollars," with Bubeck adding this was roughly 1,000 times what the company spent on earlier mathematical results. According to OpenAI's account, the agents reached a solution Saturday, about 88 hours after launching the project.

For 90 years important aspects of the problems have lacked a proof, the argument underlying a correct math equation. OpenAI said its work showed that these equations can break down over time, answering the question as set out by the Millennium Prize. "This is a significant milestone for AI research, and its promise for the world is that even more of our hardest questions would become possible to answer," Mark Chen, OpenAI's chief research officer, told reporters.

Each Millennium Prize Problem carries a $1 million reward, and only one has been solved since the list was published in 2000. OpenAI says it will not claim money if its finding is confirmed.

OpenAI's claim arrived hours after Tristan Buckmaster, a mathematician at New York University, and Levent Alpoge, who works at OpenAI competitor Anthropic, released their own AI-assisted work on three related equations.

In a statement published alongside his papers, Buckmaster said OpenAI had taken up the problem only after word of his research spread, and pursued the same unusual approach he and Alpoge had spent months developing. OpenAI's researchers denied having had any access to the rival team's work and said they proposed sharing credit before realising that Buckmaster and Alpoge had fallen short of solving the problem. "To be clear, we did not use their prompts or proofs to prompt our models or direct our agents," Bubeck said.

However, in a later post on X, OpenAI said "while unlikely, we cannot rule out that de-identified data derived from their usage of our products helped improve our models." AFP

Experts fear AI could design & develop its own successor

▶Continued from P1

Samuel Marks, another Anthropic researcher specialising in scalable oversight, added an even more uncomfortable observation: AI developers believe their technology could cause human extinction "in the next few years," and, he said, the more senior the employee, the more concerned they tend to be.

"Why do AI developers continue despite the risk? Due to a mixture of commercial incentives and a belief that they are in a race with other, less responsible AI developers that will abuse the technology or develop it less safely," Marks explained. "Unlike traditional software, we can't "program" AIs to behave how we'd like. AIs frequently severely misbehave. For instance, AIs from multiple developers recently hacked their way out of secure evaluation environments and into real-world companies, even though no one asked them to do this," he noted.

The concern among AI gearheads is recursive self-improvement (RSI): AI systems increasingly helping humans build better AI systems, eventually reaching the point where an AI can substantially design and develop its own successor. Anthropic says that threshold has not been reached and is not inevitable. But its researchers say the trend is moving faster than expected.

More than 80% of the code merged into Anthropic's codebase was reportedly authored by Claude by May 2026, while the company says its engineers were merging roughly eight times as much code per day in the second quarter of 2026 as they did in 2024. This matters because if AI becomes much better at designing algorithms, running experiments, writing code and conducting research, the pace of improvement could accelerate dramatically.

Today's AI helps humans build tomorrow's AI; tomorrow's AI might help build the AI after that. And if the improvement loop becomes fast enough, researchers worry that safety mechanisms developed at human speed could be hopelessly outpaced.

The race is getting uncomfortable. OpenAI has just released GPT-6 Astra, which it describes as its most capable model yet, reaching the company's "Critical" level for cybersecurity capability — meaning it can perform sophisticated cyber tasks that raise substantially greater misuse concerns. Anthropic, meanwhile, has released Claude Fable 5.1 and the more restricted Mythos 5.1 aimed at high-end cybersecurity and biological research and remains available only to vetted organisations.

Incidentally, Anthropic's brand was built partly around being the AI company that would be more cautious than OpenAI. Now Anthropic's own researchers are warning that Anthropic itself is caught in the race. Coxon says the problem is a classic prisoner's dilemma: each company may believe it would be safer to slow down, but fears that its rival will continue regardless.

All this leaves humankind with a modest assignment for the rest of the decade: Build machines vastly smarter than ourselves; teach them human values; make sure they don't deceive us; make sure they don't escape our control; make sure they don't develop their own goals. And, ideally, do all this before they become clever enough to notice that we have assigned them the job.

Iran and US hit tankers in biggest wave of attacks on shipping since war began

Tehran Hits 10 Ships In Hormuz After US Sinks 5 Iran Oil Tankers

Cairo/Washington: Iran said Wednesday it had attacked 10 ships near the Strait of Hormuz after the US sank five Iranian oil tankers, in the biggest declared wave of tit-for-tat attacks on shipping by both sides since the start of the six-month-old war.

The attacks sent the price of oil surging, with the international Brent crude benchmark breaching $100 a barrel for the first time since July. At least one seafarer aboard a tanker was reported killed and another listed as missing.

Iran also said it had fired ballistic missiles at a base used by US forces in Jordan. Attacks by both sides since the end of Aug have shattered a month of relative calm.

The Revolutionary Guards said they would sharply escalate their response to any further attacks, and if the enemy struck two or three Iranian targets, Iran would respond by hitting 20.

Video shows tankers ablaze

The Americans said they destroyed five Iranian oil tankers overnight, releasing video of ships ablaze before they sank. The US military's Central Command called its attacks a response to Iran's Islamic Revolutionary Guard Corps targeting a US navy warship twice with ballistic missiles over the previous two days. No Americans were harmed, the US said. Washington has announced a new policy of attacking Iranian tankers in retaliation for fire that threatens its warships. Iran says it is using new, more capable missiles to attack US ships.

"Iran continues to try to hit US naval ships, and for every time they do that or try to do that, they're going to lose tankers," US secretary of state Marco Rubio told reporters during a visit to Colombia.

After Iran announced its strikes in response, saying it fired on two US ships and eight tankers, reports indicated vessels had been hit in waters near several neighbouring countries. One seafarer was killed aboard the oil products tanker Hercules Star while at anchorage off Dubai and another crew member was missing, the vessel's charterer, Peninsula, said. Maritime security sources said it may have been hit by a drone.

The British maritime security agency UKMTO described a vessel in the vicinity that was listing, possibly taking on water after being struck by a projectile. Reuters could not immediately determine whether this referred to the same ship.

Two Iraqi port officials said a tanker carrying 2 million barrels of fuel oil, the New Andros, had caught fire after being struck by a drone in Iraqi waters. There were no reports of casualties among the 22 crew.

The UKMTO said it had received reports of several merchant ships struck by disabling fire in the northern Gulf and Gulf of Oman, on either side of the strait. It was not immediately able to confirm casualties or environmental impact. Iran also threatened oil tankers in Kuwaiti and Bahraini ports, according to a statement carried by state media. A maritime security source reported a liquefied natural gas tanker was damaged in the Emirati port of Khor Fakkan. The IRGC also said Wednesday it had fired ballistic missiles at a base used by US forces near Al Azraq in Jordan. REUTERS

Reuters

Water is sprayed on oil tanker New Andros, which, according to port officials, was struck by a drone in Iraqi territorial waters on Wednesday

'Prohibited zone' extends beyond Hormuz Strait into Arabian Sea: Iran

Iran's Revolutionary Guards Wednesday said a new "prohibited zone" would cover waters many miles beyond the Strait of Hormuz and apply to ships as far as the Arabian Sea. Iran had first announced the "prohibited zone" earlier this week as it continued talks with Oman over a temporary shipping route through the strait.

In an interview, Revolutionary Guards spokesman Hossein Mohebi said the "prohibited zone" would cover "part of the Sea of Oman and another part of the Arabian Sea, along the route that can lead to the Strait of Hormuz".

He added that exact coordinates would be announced later. "If a vessel enters that area without coordination, it will be subject to our sanctions," he said. "It means, for example, that if it later wants to come and use the Strait of Hormuz, if it wants to receive services somewhere, such as insurance or other related services, we will refrain from providing those services," he continued.

Tehran has demanded that vessels seek permission to transit the strait, insisting there will be no return to the pre-war system of unrestricted navigation. AFP

Iran: Captured American sub drone; US says 'it was defective'

Washington: Iran's Revolutionary Guards said Tuesday it had captured a US uncrewed submarine at the entrance to the Strait of Hormuz. Iranian state media said the vessel was a Dive-LD, a large autonomous underwater vehicle built by California defense firm Anduril.

The 19-foot submersible can carry out missions including mine countermeasures, seabed mapping, intelligence gathering and the inspection of underwater infrastructure such as cables and pipelines, the company has said.

"We trapped one of the most modern, intelligent and unmanned submarines of the terrorist American army at the entrance to the Strait of Hormuz. This submersible is equipped with the latest technologies," the Revolutionary Guards navy said.

In response, a Pentagon spokesperson said an underwater drone had "malfunctioned more than a day ago." "It was surveying regional waters in support of ongoing operations. The defective drone was an older model that neither collected sensitive data nor carried any classified sonar or radar equipment," the spokesperson said. Anduril confirmed the loss of one of its vessels. According to Anduril's website, Dive-LD can operate for up to 10 days without returning to base and is designed to dive to depths of as much as 19,700 feet. REUTERS

Bangladesh fights world's worst measles outbreak as vaccination gaps fuel spread

Dhaka: Bangladesh, which once came close to eliminating measles, is facing its worst outbreak on record, with 999 suspected and confirmed measles-related deaths reported since March as hospitals struggle with overcrowding, shortages and a continuing influx of sick children.

The prolonged outbreak, despite a nationwide emergency vaccination campaign launched in April, follows disruption to routine immunisation in 2024 and 2025, experts said, when the country was going through turmoil after a deadly uprising against then PM Sheikh Hasina.

Since the outbreak emerged in March, Bangladesh has recorded over 166,000 suspected measles cases, including 19,835 laboratory-confirmed infections, according to health ministry data.

Hospitals are struggling to cope with the surge in cases at a time when growing numbers of dengue patients are putting additional pressure on an already overstretched healthcare system.

More than 45,000 people have been admitted to hospital for dengue this year, according to health ministry data. On Tuesday, dengue deaths rose to nine, while admissions climbed to 1,571, both daily highs for the year. Dr Nanda Dulal Saha, acting director of the state-run Shaheed Suhrawardy Medical College Hospital in Dhaka said the hospital currently had 60 beds for measles patients, but many were being treated on the floor. Saha said a shortage of paediatric saline, which can help alleviate the symptoms of measles, was complicating the situation. The hospital, designed for 1,350 patients, is caring for more than 2,350, he said. REUTERS

Yemen rebels claim dozens of new strikes against Saudi

Yemen's Houthi rebels reported dozens of Saudi airstrikes Wednesday as daily attacks continued in a conflict that has reignited during the West Asia war, with hundreds of people killed in fighting near the Red Sea.

More than 50 attacks targeted several regions, including the flashpoint areas of Taiz and Hodeida, the scene of fierce clashes between the Houthis and the Saudi-backed govt, the rebels said. "It's a catastrophe, and the attacks are ongoing," said Mohammed Khudairi, one of nearly 20,000 people who fled the fighting, according to the International Organisation for Migration. "We managed to leave, but others remain trapped there," he said at a displacement camp of wood-and-straw huts on the Red Sea coast. AGENCIES

Pak warns Houthi attacks could activate joint defence pact

Pakistan said there should be "no ambiguity" that an attack on any one of the three members of the newly formed Mecca Defence Alliance would be treated as an attack on all, as it warned that the pact could become operative following Houthi strikes on Saudi Arabia. In a TV interview, Pakistan's defence minister Khawaja Asif said Islamabad would honour its commitments under the pact. Asif, however, said he was not aware of any contact between Pakistan and Saudi Arabia following the attacks. He stressed that the pact did not authorise the three countries to launch attacks against another state on their own initiative. PTI

IAEA reports Iran to UNSC for first time in 20 years

Vienna: The UN atomic watchdog's board on Wednesday reported Iran to the UNSC for the first time in 20 years for failure to cooperate in a long-running probe into uranium traces detected by inspectors at various undeclared sites in Iran. Twenty-three countries on the IAEA's 35-member board of governors voted for the resolution at IAEA headquarters in Vienna.

China, Russia and Niger opposed it, while eight countries abstained and one didn't vote as it was in arrears, according to diplomats. The resolution was put forward by the US, Britain, France and Germany. Western officials suspect that the uranium traces could provide further evidence that Iran had a secret nuclear weapons programme until 2003. Iran says that it's not pursuing nuclear weapons. AP

UK rules out cyberattack as more flights cancelled

London: Airlines scrambled Wednesday to dig out from the backlog triggered by technical problems experienced by the UK's air traffic control system that has forced the cancellation of more than 2,000 flights. Delays continued for a second day Wednesday, rippling across 15 airports in Britain and beyond as airlines and airports worked to clear a huge backlog of cancelled and delayed flights.

The problems stranded passengers for hours on airport runways and in terminals. Flight delays were expected to continue through the day Wednesday as airlines rebook stranded passengers and work to reposition aircraft left at the wrong airports by the cancellations.

NATS, formerly known as National Air Traffic Services, which operates the UK air traffic control, attributed the problems to "an issue in our flight processing system". The company said that it was supporting airlines and airports while they recover from the "ongoing disruption," although the original technical issue was resolved Tuesday.

But airlines were furious, demanding that the head of NATS, Martin Rolfe, consider resigning after the second air traffic meltdown in three years. Rolfe said "we have at this point ruled out cyber" activity as a cause. UK transport secretary Heidi Alexander met with Rolfe Wednesday and gave him one week to complete a full investigation into the incident to make sure lessons are learned. PM Andy Burnham's office said that Rolfe retains the confidence of govt. AP

US accuses AI cos in China of 'systematic' theft

Washington on Tuesday accused top Chinese AI labs including DeepSeek and Moonshot AI of systematically stealing the capabilities of US models.

The advisory from the US cyber defence agency follows several accusations of Chinese AI theft through distillation. "China-based AI companies are conducting systematic extraction of proprietary functionalities of US AI companies' models," the advisory read. They are doing so "through industrial-scale knowledge distillation campaigns that form the core of their AI development strategy", it said. Distillation is where an AI model is trained to mimic the output of a larger, more capable one. AFP

Hours after a Russian attack destroyed their home, a Ukrainian couple — Liudmyla Ryzhak (R) and her soldier fiancee Leonid Ryzhak — tied the knot in Kyiv on Tuesday. War with Russia had repeatedly delayed their wedding, but like many others in Kyiv, the couple decided the attacks would not derail their lives and forged ahead with the ceremony

Greek woman has IVF birth from 22-yr-old embryo after losing son

A Greek woman has given birth from an embryo frozen over 22 years ago, months after her son born from the same treatment in 2004 died in an accident, her doctor said Wednesday. "For Christina Rapti Tzelepi, today's birth carries special emotional significance," gynaecologist Konstantinos Pantos said in a Facebook post. "In 2004, after an embryo transfer, she had a healthy baby boy on the first attempt. In Oct 2025, the family experienced the tragic loss of their son in a road traffic accident at the age of 21," Pantos said. Rapti-Tzelepi is 54, the maximum allowed age in Greece for in vitro fertilisation. She gave birth to a baby girl Wednesday following the transfer in Dec of an embryo from the same initial batch, Pantos said. "There was mourning and joy involved, but everything disappeared this morning when we held our beauty in our arms," Rapti-Tzelepi told state TV ERT.

Thailand investigates after Briton dies from penis enlargement: Thai authorities said Wednesday they are probing a Bangkok clinic where a Nigerian-born British businessman and influencer underwent a penis enlargement procedure that led to his death. A coroner in London last month ruled that the March 6 death of Igho Ubiribo, 43, in the Thai capital was caused by the hyaluronic acid injection he received hours earlier. The case has reignited debate about medical tourism, with Thailand a leading destination for visitors seeking healthcare.

Trump makes 9/11 about himself, won't mark 25th anniv at Ground Zero

In President Donald Trump's telling at a White House event on Tuesday, two firefighters bodily lifted him to safety from a site near an unstable building after the Sept 11, 2001 attacks. "And I'll never forget," Trump said, "we thought it was coming down on top of us, and two firemen, big strong guys — and I'm not the smallest guy in the world — they grabbed me under the arm, said, 'Got to get out of here!'" Trump said.

His comments, at an event honouring emergency personnel killed on 9/11, appeared to be a new instalment in a constantly evolving narrative that Trump has told over the years about his actions after the attacks. It's a story that has long featured the New York property tycoon as the hero, with variations on him taking workers down to Ground Zero.

But Trump's version of events is one that US media say is disputed by rescue officials present at the time. The remarks also come amid a stir about Trump not being present as president in New York for the 25th anniversary of the attacks in which 2,977 people were killed. Instead of being at the site where Al-Qaeda hijackers rammed planes into the World Trade Center towers, Trump will pay his respects on Friday at the Pentagon in Washington, another target in the attacks.

Trump and the White House have hotly denied reports that he chose the Pentagon because he was not allowed to deliver a speech at the 9/11 memorial. "This is more Corrupt News, I've been to New York many times over the years, and no one ever speaks; it's a 'solemn ceremony!'" Trump said on his Truth Social network last week. Vice President JD Vance and Trump's living predecessors — Democrats Joe Biden, Barack Obama and Bill Clinton, as well as Republican George Bush, who was president at the time of the attacks — are all expected at "Ground Zero." Later on Friday, Trump is due to fly to Ireland where he will attend the Irish Open golf tournament at his family's golf course over the weekend.

His absence from New York marks a contrast with Trump's usual approach, which has been to put himself at the heart of the 9/11 story. Two days after the attacks, Trump told reporters that he had been to Ground Zero and had sent 100 workers to the site to help with recovery efforts. CNN and New York Times said people present at the site disputed his account.

In the event on the White House Ellipse on Tuesday, where a steel beam recovered from the World Trade Center's South Tower was on display, Trump gave a fresh account of his actions that day. Trump said it had been a "beautiful morning" and that he had then seen a news alert on television, before looking out of his window "and I saw things that I never want to see again".

Trump clarified his recollections in a lengthy Truth Social Post Tuesday evening. "I was there, obviously not on the same day as the collapse, but shortly thereafter, with a large group of Construction Workers," Trump wrote, in a post accompanied by a video showing answering reporters' questions. "I was there as soon as the Law allowed," the US president added, as he lashed out at journalists and accused them of spreading "fake news". AFP

Last man standing: All but 1 of 729 voters deleted in enclave

No 'Address Proof' As Shanties Demolished

Ishita.Jairath@timesofindia.com

New Delhi: There is only a hint of a settlement that lies beyond a lush green patch as you look out towards Yamuna floodplain near Vijay Ghat. A narrow, bumpy road, slick after recent rains, slowly reveals a cluster of jhuggis. At first, a lone house appears. Then two more. They come into view bit by bit, tucked behind trees, away from the main road.

In one such jhuggi lives Dulari Devi (48). For as long as she remembers, the area called Bela Estate has been her home. She said she got married here and raised her children here; she says. "I voted here for years," she says.

But she now finds her name missing from the draft roll released by the office of chief election officer, Delhi. And she is not alone. Residents of the Bela Estate jhuggis say the names of 728 voters there have been removed. Only one name remains — Mahant Kanchan Giri. This lone voter lives in what residents of the jhuggi describe as a more "permanent" home, which is a Hanuman temple compound closer to the main road. A walking path connects the temple to the cluster, residents say, though reaching the cluster by car from the temple can take up to 10 minutes. Giri confirmed his name was in the draft roll but declined to comment further.

At the jhuggi cluster, Dulari Devi reaches for a set of neatly stacked papers. Among them is the enumeration form she submitted a few weeks ago. Next, she holds up the 2002 electoral roll. "See, my name is there in SIR 2002," she says. Her name is now gone, with the words "permanently shifted" appearing alongside it. As per the rolls, her son and daughter-in-law have also shifted.

Bela Estate is among the jhuggi clusters in the city that have been demolished over the past three years under court orders, which decided the houses were encroaching upon the floodplain.

Election Commission officials, meanwhile, said the issue was linked to address proof. The cluster, officials said, has undergone demolitions and is no longer an authorised settlement.

'AI could kill all humans': Researcher sounds alarm

Chidanand Rajghatta | TNN

> I resigned from Anthropic today. I spent the last three years doing pretraining research at both OpenAI and Anthropic. **Neither company is acting responsibly. They are racing straight to self-improving superintelligence and gambling with our lives.** Do not underestimate the power of this technology. These will soon be superhuman systems that can hack anything, revolutionise any field overnight, and acquire real power and resources. We have all witnessed the progress in each of these domains, and progress is not slowing
> —JACOB COXON

Washington: A researcher at Artificial Intelligence firm Anthropic quit his job on Tuesday with a grim warning over the rapid progress in the field, warning that advanced AI could end up killing humanity as soon as 2030.

"The people building AI earnestly believe that it could kill us all by the end of the decade. This is not a marketing stunt," Coxon, who is himself among those building AI, wrote on X while announcing his resignation, igniting a firestorm of alarming — and in some cases, frivolous — responses.

▶OpenAI: Solved 90-yr maths problem, PG OPP

A researcher who has spent the past three years working on AI pretraining at OpenAI and Anthropic, Coxon accused both firms of "racing straight to self-improving superintelligence and gambling with our lives".

He argued that increasingly capable systems could hack computer systems, conduct scientific research, acquire resources and eventually become sufficiently autonomous that humans lose control of them.

Coxon's prognosis could have been dismissed as the bitter farewell note of a departing employee — except that some of his colleagues promptly expressed their support. Evan Hubinger, Anthropic's Alignment Science lead, essentially endorsed his views.

"Jacob is correct here—we really do earnestly believe AI could kill all humans!" Hubinger wrote. More unsettlingly, he acknowledged that Anthropic does not yet have a plan to solve "alignment" for superintelligence and is not clearly on track to do so.

With biggest wave of attacks on tankers, Iran & US escalate fight

In the biggest wave of attacks on shipping since the West Asia war began six months ago, Iran said on Wednesday it attacked 10 ships near Strait of Hormuz after US sank five Iranian oil tankers. Iran said it hit two US ships and eight tankers.

Iran also fired ballistic missiles at a US-used base in Jordan, which were mostly intercepted, according to Jordan. US said its tanker strikes followed two Iranian ballistic missile attacks on a US Navy ship.

Iran has largely choked off transit through the strait that carried a fifth of global oil before the war, while Washington has blockaded Iranian ports, plugging Iran's oil exports and its source of revenue. Meanwhile, Saudi Arabia and Iran-aligned Houthis are escalating, with Houthi attacks igniting Saudi oil installations and Riyadh carrying out retaliatory strikes on parts of Yemen. SEE PAGE OPP

Arabian Sea parts now prohibited zone: IRGC

Iran's Revolutionary Guards has said a new "prohibited zone" would cover waters many miles beyond the Strait of Hormuz and apply to parts of the Arabian Sea, along the route that can lead to the strait. IRGC spokesperson said coordinates would be announced later. PAGE OPP

Indian crude oil basket nears $109

As Brent prices crossed $100/barrel due to renewed hostilities in West Asia, state-owned fuel retailers are estimated to be losing around Rs 5 per litre on petrol and Rs 23 on diesel. Indian basket of crude oil reached $108.91 on Tuesday, highest since May 21. OTHER BK, P9

ITAT cuts 200% penalty on NRI in interest case

The Mumbai bench of the income tax appellate tribunal (ITAT) has reduced a penalty imposed on a 57-year-old NRI woman from 200% to 50% of the tax payable on under-reported income, **reports Lubna Kably.** It held every instance of income omission can't automatically be treated as 'misreporting', which entails higher penalty under Sect 270A of I-T Act. She had originally declared a total taxable income of Rs 44,000. I-T learnt that she had earned interest income of nearly Rs 14.5 lakh, of which around Rs 14 lakh had not been offered to tax. P7

Fugitive wanted in rape case arrested after 38 yrs

Sudeep.Lavania
@timesofindia.com

Agra: A 70-year-old man wanted in a 38-year-old kidnapping and rape case in West Bengal was arrested from Vrindavan in Uttar Pradesh, where he had allegedly been living under the guise of a sadhu for 32 years, police said Wednesday.

Vrindavan SHO Ashwini Kumar told **TOI** that a West Bengal police team from Nadia district's Tehatta station, led by SI Bikash Ghosh, raided a rented house in Vrindavan and arrested the accused, Budhdev Haldar, Tuesday. A Mathura local police team assisted them.

Police said Haldar was allegedly involved in the kidnapping and rape of a young woman in 1988.

During interrogation, Haldar told police that he survived in Vrindavan by begging for 32 years.

Speaking to **TOI**, SI Bikash Ghosh said, "This is a very old case. There was a court warrant against the accused and he was arrested." Further, legal proceedings would follow in West Bengal.

A police officer in Mathura said mobile records helped establish movements of the accused which led police to trace him to Vrindavan.

HC: Right to pick partner trumps parents' concern

Allahabad HC allowed an 18-year-old woman from Budaun to live with her husband, holding that an adult's right to choose a partner and residence is protected under Constitution and parents' concern can't override it.

The court directed authorities to ensure the couple's safety. It was alleged that following the marriage, the woman illegally detained by her father. "The right to choose one's partner is a facet of personal liberty and dignity, and the state and its instrumentalities are required to respect such autonomy...," the HC said. TNN

Creating a multi-layered security grid in Delhi, one Brics at a time

TIMES NEWS NETWORK

New Delhi: When the 'Flying Kremlin' and other ultra-secure aircraft touch down in Delhi this weekend, they won't just bring Russian President Vladimir Putin and other high-profile world leaders to the Brics Summit, they will land with a fully autonomous fortress-on-wheels featuring personal food-testing labs, decoy dignitaries and armoured limousines built to survive landmines and chemical attacks.

As Delhi transforms into an impenetrable, multi-layered defensive grid, security personnel are bracing for a high-stakes security operation where AI-aimed snipers scan rooftops, gesture-recognition cameras spot human posture shifts, commandos slither down ropes from hovering helicopters and anti-graffiti strike teams patrol the streets 24/7, guarding against everything from high-tech threats to stealth protest tactics.

The capital, sources said, hasn't seen security this tight since the 2023 G20 summit, and preparations this time are even more extensive. Unmanned aerial vehicles have been categorised as one of the most potent threats, and systems that can jam drone signals or shoot them down have been installed at several locations.

Every dignitary or their hotel or carcade has been assigned a code name or call sign to ensure they are guided smoothly between locations without any overlap or security glitches. Intelligence inputs have hinted at the possibility of flash protests and spray-painting of inflammatory slogans near the venues, targeting some foreign leaders. Cops have formed anti-graffiti teams for round-the-clock patrolling to thwart any such attempts.

President Putin's security grid comprises a sophisticated protective shield managed jointly by Russia's Federal Protective Service (FSO) and Indian counter-terrorism forces. Ground mobility will be centred around his custom-made, heavily armoured Aurus Senat limousine, often referred to as a "rolling bunker". Transported directly from Moscow, the state car is built to withstand chemical attacks, landmines and sniper fire, complete with run-flat tyres and an independent emergency oxygen supply.

Up in the air, the Russian leader travels in a specially modified Ilyushin IL-96-300PU aircraft, known as the "Flying Kremlin", which operates alongside decoy jets, advanced missile-defence countermeasures and secure command systems. On the ground, the innermost protective layer comprises elite officers from Russian Presidential Security Service (SBP), supported by advanced FSO teams that sanitise every scheduled and potential itinerary venue. The Russian delegation manages its own strict logistics, travelling with personal chefs, portable testing laboratories for food and drink, and measures to collect biological waste, alongside deploying dummy dignitaries in select hotels to boost operational security.

Securing the designated summit hotels in central Delhi, Aerocity and Gurgaon presented one of the most formidable logistical challenges for intelligence and law enforcement agencies. Every hotel is being managed as an independent secure zone under its assigned DCP venue commander, supervised by special commissioner-rank officers overseeing broader zones.

Within each hotel, two rooms have been repurposed into operational command posts: a primary security control room linked directly to Delhi Police's central C4i command node and a secondary contingency room dedicated to emergency management.

To prevent unauthorised access, advanced AI cameras equipped with posture-detection and intrusion-alert software monitor perimeter walls and hallways, capable of flagging unusual physical movements like crawling or wall-scaling. Hotel staff have undergone rigorous multi-round background checks conducted by special branch and special cell, with movement restricted strictly to assigned floors using specially programmed digital keycards.

▶Social media vigil, P 3

SECURING THE SUMMIT

Surveillance On Ground, In Air

- Counter-drone systems equipped with 'soft-kill' and 'hard-kill'— jam signals or shoot it down — will be part of the air-defence apparatus
- Snipers to have guns with AI-aided aiming technology. Gesture recognition cams to spot suspicious movements
- Police monitoring social media channels to curb rumour-mongering and inflammatory content. Anti-graffiti teams in place
- Intel inputs regarding flash protests targeting some foreign leaders conveyed to law enforcement
- NSG, under Op Brics Kavach, simulated hostage rescue and other drills at Bharat Mandapam, Rajghat, JLN Stadium, Polo Ground, etc

Commandos conducting 10-metre helicopter slithering drills for rooftop insertions at hotels and main venue

Air Force maintaining constant air patrols, supported by **450+ quick reaction teams and firefighting robots**

Red Fort Blast: How Traffic Forced A Change In Plans

Lal Mandir Original Target, But Bomber Couldn't Park Car: Chargesheet

TIMES NEWS NETWORK

File photo

The blast led to the death of 11 people and injuries to 29

New Delhi: On Nov 10 last year, 13 minutes before the explosive-laden i20 exploded near Red Fort, bomber Umar-un-Nabi tried to park the car near 'Lal Mandir' in Chandni Chowk — suggesting it was the first target — but was diverted due to heavy traffic and police presence there. CCTV footage captured him attempting to park at 6.37pm, after which he took a U-turn and reached near Gate No. 4 of Red Fort, where he triggered the IED at 6.50pm.

The details are part of the chargesheet recently filed by National Investigation Agency (NIA) in connection with the Red Fort blast. The chargesheet provides extensive details of the planning and execution of the first-ever vehicle-borne IED (VBIED) attack reported in the national capital.

NIA has said the VBIED was detonated through a remote 'command mechanism' fitted in one of the shoes of the bomber, Umar-un-Nabi. A metal piece attached to the heel of one shoe was found adjacent to the i20 used by Umar, and it tested positive for triacetone triperoxide (TATP), potassium and ammonium nitrate. The other exhibits from this car included a nasal orifice swab matched with the DNA of Umar's parents, confirming his identity as the bomber, the chargesheet stated.

Further, a forensic report of the blast reported in Nowgam, J&K, on the explosives seized from Umar's associates from Faridabad also tested positive for the same chemicals, confirming the module's existence.

"The yield (impact) of TATP and its stability also depends on its storage in a cold environment and presence of 10% water. Witnesses have deposed that Umar used to keep his room extremely cool, and that a foul smell used to emanate from it. He and others had also purchased collapsible water bags, which were used to keep the prepared TATP under wet conditions to keep it safe. Water was regularly added to the IED to keep the explosive mixture stable," the chargesheet said.

The post-mortem reports of the victims furnished by the hospital ascertain the cause of death to be "high-intensity blast wave effect". The blast, the chargesheet said, led to the death of 11 people and injuries to 29. Damage to the nearby structures amounted to Rs 17.7 lakh, as assessed by authorities like DMRC, ASI and PWD, it added.

NIA found that on Oct 30, Umar met an acquaintance behind Al Falah hospital, gave him his room key and asked him to bring his "shoes" from the almirah in the room. "He was already wearing his shoes at the time. He was visibly distressed as J&K police had raided the module by then," said the chargesheet.

While on the run, Umar was storing his urine in a polythene bag, as observed by the woman who owned the house in Nuh where he had sought shelter. "He did not go outside to dispose of it and thus a foul smell was emanating from the room, prompting the woman to complain to her husband," the chargesheet said.

"Interestingly, an innovative method for preparing explosive substances using urea nitrate has been elaborated in a PDF material seized from the pen drives of the accused wherein an alternative method for the source of urea is mentioned as — 'extracting urea from urine'."

It also mentioned the seizure of a terror manual, "Lone Mujahid Pocket Book", which was published in "Inspire" magazine, affiliated with Al-Qaeda in the Arabian Peninsula (AQAP), being followed by the module. NIA said the manual provided operational information related to explosives, weapons, vehicles, arson and covert activities, with detailed chapters on TATP and remote-control mechanisms for detonating IEDs.

On Nov 7, Umar also bought a new T-shirt, a wine-coloured shirt and green-coloured cargo pants by making payment in cash to a shop in Nuh, the chargesheet said.

After long wait, DERC gets ex-IAS officer as chairman

Abhinav.Rajput
@timesofindia.com

New Delhi: Former IAS officer Subhash Chandra Lal Das has been appointed as the new chairman of power regulator Delhi Electricity Regulatory Commission (DERC). The post was lying vacant for more than a year.

In a break from the tradition, a retired IAS officer, instead of a retired high court judge, has been given the charge, officials said.

"In exercise of the powers conferred by Section 45D of Government of National Capital Territory of Delhi (Amendment) Act, 2023, read with Section 84(1) of Electricity Act, 2003, President is pleased to appoint Subhash Chandra Lal Das (retd) IAS (AGMUT:1992) as the chairperson of Delhi Electricity Regulatory Commission," stated a notification issued by Delhi govt's power department Wednesday.

In a break from the tradition, a retired IAS officer, instead of a retired high court judge, has been given the charge, say officials

In May, a committee was formed by lieutenant governor TS Sandhu for selecting the chairperson and DERC's two members. The post of the DERC chief had been vacant since July 2025, hampering crucial work, including annual power tariff fixation and the recovery of pending dues of Rs 38,500 crore of the three power discoms in the city.

The last chairman of the three-member commission was Justice Umesh Kumar (retd). In the absence of a chairman, its two members, Surender Babbar and Ram Naresh Singh, were holding the fort.

Govt has also appointed two new members — Praveen Gupta, member (thermal) of Central Electricity Authority, as member (non-legal) and retired district judge Ajay Kumar Jain as member (legal).

As a chairperson is mandatory to hear formal disputes, the related work has been pending since July 2025, a senior govt official said. This has caused a massive backlog of unresolved consumer grievances and legal disputes among discoms, he added.

Officials said that without a regular chairperson to finalise the annual power tariff orders, planning for winter and summer power purchase agreements also got affected, leaving the power distributing companies uncertain about their operational cash flows for infrastructure upgrade and peak-demand management.

JNU student: Teacher 'forced' me to recite 'will study Hindi'

Sugandha.Jha1
@timesofindia.com

New Delhi: A JNU student from a non-Hindi-speaking state has alleged her faculty member at Centre for Japanese Studies made her repeat the sentence "I will try my best to study Hindi" several times in front of her classmates as a form of punishment for not being able to comprehend the language, leading to a "panic attack".

A complaint was submitted to the dean of School of Language, Literature and Cultural Studies Shoba Sivasankaran on Sept 8. There was no immediate response from either her or the faculty member.

The MA second-year student from Karnataka, who belongs to SC category, alleged the teacher mocked her accent and difficulty with Hindi words, and encouraged classmates to laugh at her.

She alleged she had been subjected to such behaviour since the beginning of her programme, creating "an increasingly distressing and intimidating classroom environment". "In recent months, I have experienced severe anxiety, nausea, fear and panic-like symptoms before and during the class," the complaint stated.

She decided to file the complaint after a recent incident on Sept 1, when a confrontation with the professor over her attendance led to her breaking down. "When I returned to class on Sept 1, the teacher interrogated me in front of the class for missing lectures. I responded, 'I was sick for two weeks, and I am still sick.' He then asked why I had not submitted an application letter to the office," she alleged. She claimed he accused her of "showing attitude" and disturbing the class, and eventually told her to either stop or leave. "By that stage, I was extremely distressed. I responded by saying, 'You have been terrorising us,' and left the classroom," she stated. The professor then allegedly refused to take classes.

The student has sought measures to prevent further "public humiliation, linguistic targeting and intimidation".

Hansraj's safety advisory puts onus on students, draws flak

Sugandha.Jha1@timesofindia.com

New Delhi: An advisory by Delhi University's Hansraj College asking students to personally ascertain the safety of PGs and hostels before moving into them has drawn flak from students and teachers, who slammed the college for putting this onus on the students.

Issued on Sept 7 following the collapse of the PG building in Satya Niketan where DU students were staying, the advisory stated, "All students are advised to exercise due caution while selecting PGs, hostels, rented accommodation, or other residential premises."

It added, "Before shifting, students are advised to personally ascertain the safety and security arrangements of the accommodation," listing fire safety equipment, emergency exits, electrical and structural safety, secure entry and exit, and emergency access among the aspects that needed to be checked.

A history student criticised the move on social media, saying, "The audacity to put out this advisory in the face of the recent tragedy... As if the students have a choice."

The student also referred to Hansraj's decision in 2022 to build a cow research centre on land earlier designated for a women's hostel, which had triggered student protests at that time.

Pankaj Garg, faculty member and chairman of INTEC, said colleges are being pushed to take a loan from Higher Education Financing Agency (HEFA) to build hostels following Sunday's tragedy, but govt-level funding is needed for large-scale expansion.

"And, it is insensitive to ask students to take responsibility for their own safety when they have little control over the city's largely unregulated PG market," Garg said.

The criticism comes as Hansraj's own hostel facilities remain temporarily closed this academic session for comprehensive renovations.

Hansraj principal Rama said the college's existing hostel infrastructure is currently being dismantled to make way for a new hostel facility for both men and women. The proposed facility will have 550 to 600 beds and is estimated to cost Rs 83 crore, she said, adding, "It will take time to arrange these funds... we are trying, either through DU or Delhi govt."

On the land being used for the cow research centre, Rama said, "There is only one cow there... it is not going to occupy a lot of space. Ours is a college where we also perform havans and follow Arya Samaj ideology, so we do all these things. No land is being misused."

Teachers' forum seeks safety audit of PGs near DU

New Delhi: A teachers' body has called for an inspection of private hostels and PG accommodation around DU colleges, flagging concerns over structural and fire safety following the recent incident in Satya Niketan.

National Democratic Teachers' Front sought a time-bound inquiry and action against those found responsible for negligence or safety violations. It also urged DU to constitute a special task force to explore increasing hostel facilities for UG students and examine norms governing private accommodation. The association also suggested that colleges maintain updated records of students' local addresses and places of stay.

It said the incident had raised concerns over adherence to structural and fire-safety norms in privately operated accommodation. TNN

nie NEWSPAPER IN EDUCATION

Laxman Public School, Hauz Khas, hosted the Laxman Memorial Inter-School Competition in remembrance of founder members Laxman S Agarwal and Shyama Laxman Agarwal. Students from 19 Delhi schools participated in competitions including English, Hindi and Sanskrit Recitation, Chitralipi Painting, Innovatrix – Mathematical Model Making, and Quark – Science Quiz. Members of the Managing Committee graced the occasion, while judges shared valuable feedback. Springdales School, Dhaula Kuan won the Overall Trophy. Tthe event celebrated young talent and reaffirmed the school's commitment to its motto, "Be Yourself."

Laxman Public School, Hauz Khas

Indirapuram Public School, Indirapuram, organised 'Adwitiya' on the theme "Nature Trail – Every Step Unfolds a Wonder", with nearly 1,200 children from around 35 playway schools across Delhi-NCR participating. Activities included Magic Extravaganza, Puppet Show, Explorers' Expedition, and Nature Discovery Zone. Principal Dr Ashish Mittal highlighted the importance of experiential learning in fostering curiosity, confidence, sensitivity towards nature, and team spirit. The event was coordinated by junior headmistress Neelam Bhardwaj and Pre-Primary Wing coordinator Poonam Singh.

Indirapuram Public School, Indirapuram

Banasthali Public School, Vikaspuri, marked a moment of pride as principal Anubha Goyal, along with four students—Aanya Chhahira (XI), Yashika Sharma (IX), Aashriya Nigam (V), and Avni Singh (V)—had the honour of tying Rakhi to PM Narendra Modi on Raksha Bandhan. The students interacted with the PM, showcased their talents, and shared their thoughts. PM Modi warmly engaged with the young Banasthalians, making the interaction memorable and inspiring. The students gained a glimpse of leadership, humility, and encouragement, while the entire Banasthali family celebrated the occasion as a moment of national pride and honour.

Banasthali Public School, Vikaspuri

Ramjas Public School, Anand Parvat, celebrated its Annual Day at Talkatora Stadium on the theme "Satrangi: The Colors of Humanity", showcasing students' talents through music, dance, theatre, and storytelling. The event was graced by chief guests Parvest Ratn and Pratibha Prahlad. The programme featured the Swastik Ballet, Guest Felicitation, and Principal's Report by Smita Sharma Dabas, principal, followed by the Proficiency Ceremony. The Junior Ballet, "The Kite Maker, The Life Maker," highlighted parental love, guidance, and freedom, while the choir "Satrangi" celebrated harmony. The Senior Ballet, "Rangsetu – Ram Charit Manas," depicted the story of Lord Rama and the triumph of good over evil.

3-Lane Elevated Corridor Plan To Decongest Delhi-Ggn E-way

Aims To Take Traffic From Dwarka Expressway Above Existing Road: NHAI

Akanksha.Gupta
@timesofindia.com

Gurgaon: National Highways Authority of India (NHAI) is planning a three-lane elevated corridor on Delhi-Gurgaon Expressway to ease traffic congestion between Delhi's Shiv Murti and Haryana border near Ambience Mall. The elevated corridor is expected to be around 2km long.

This section of the expressway sees the heaviest traffic volume, reducing the drive between the two cities to a crawl through large parts of the morning and evening.

The three-lane elevated corridor is planned from the right-turn tunnel of Dwarka Expressway interchange near Rangpuri, with traffic emerging from the underpass being proposed to be directed onto the elevated section towards the city. Instead of merging with the already busy main carriageway of NH8, vehicles coming out of the underpass will be required to take the elevated corridor.

An NHAI official said, "The plan is to take the traffic coming from Dwarka Expressway above the existing road to ease congestion. The proposed structure will have three lanes on a single-pier configuration. It will run parallel to the existing Rajokri flyover. The proposal has been prepared and it is under active consideration."

The official said the proposal has been drawn up after a traffic assessment found that the entire NH8 stretch between Shiv Murti and Haryana border, including its service roads, is operating at Level of Service F during peak hours. In simple terms, the road is functioning beyond its comfortable capacity, with traffic moving slowly and queues building up till Mahipal flyover. The problem has become more pronounced after the opening of Dwarka Expressway.

Traffic from several parts of the capital — including south, west and southwest Delhi — now converges at Shiv Murti before entering the millennium city. Vehicles from Sonipat, Noida, Greater Noida and Ghaziabad also add to the load on this network.

Traffic problem is particularly visible on the stretch approaching Ambience Mall. A substantial portion of vehicles travelling on NH8 towards the city eventually needs to move towards the service road near the mall. But the existing two-lane service road has limited capacity. As vehicles queue up there, the tailback spills onto NH8 main carriageway. This creates a knock-on effect, with the congestion extending backwards towards Shiv Murti.

According to a survey, the daily traffic volume recorded on NH8 main carriageways was 1.2 lakh vehicles on one side and 1.6 lakh on the other. The service roads and various interchange movements also carry thousands of vehicles every day.

The existing NH8 has an eight-lane main carriageway, with four lanes in each direction, apart from two-lane service roads on both sides. Despite this, the main carriageways and service roads witness heavy traffic pressure.

However, traffic on NH-8 from Delhi will not be allowed to enter the proposed elevated road. It will continue on the existing four-lane carriageway. The elevated corridor is meant primarily for vehicles coming out of Dwarka Expressway underpass.

By keeping this traffic separate from the existing NH8 flow, NHAI expects to reduce the pressure created by merging of the two streams.

According to the plan, the elevated road will continue across Haryana border and come down opposite Ambience Mall. A ramp is proposed near the approach of the existing Rajokri flyover. This will allow vehicles heading towards Gurgaon service road to leave the elevated corridor and reach destinations such as Ambience Mall, Cyber City and Udyog Vihar.

Vehicles heading further into the city will continue on the elevated road before it eventually merges with the existing NH8 main carriageway.

This is also expected to help vehicles already travelling on NH8 towards the service road opposite Ambience Mall, as some of the traffic pressure at ground level would be taken out of the existing carriageway.

PLAN TO EASE BOTTLENECKS

The existing NH8 has an eight-lane main carriageway, with four lanes in each direction, apart from two-lane service roads on both sides. Despite this, the main carriageways and service roads witness heavy traffic pressure

- The three-lane elevated corridor is planned from the right-turn tunnel of Dwarka Expressway interchange near Rangpuri
- Instead of merging with the already busy main carriageway of NH8, vehicles coming out of the underpass will be required to take the elevated corridor

'We showed old records, but they weren't accepted'

▶Continued from P1

For families here, the omissions have come as a shock. Residents say the issue is not simply how long they have lived here or whether they have voted before, but where their address is recorded.

Kamal, another resident, said he became involved in the verification exercise because of how difficult it was for officials to reach the cluster. "No one could have reached our home on their own. So, I was called to assist the BLO around the end of June," he said.

Since then, Kamal has kept photocopies of more than 500 SIR forms submitted by residents, along with signed copies of BLO registers.

"Some are marked absent, some shifted and some permanently shifted," he said. "The SDM said our names would be removed because this is a *kachcha* (temporary) area. We showed records from 1961, 1975, 2002 and 2025, but they weren't accepted," he said.

Then there is Jitendra, another resident who says he has spent his life here. "I could have shown my education records. I was born here and have lived here. My wife's name is not in the draft roll either," he said. For him, the uncertainty is about more than the latest electoral roll.

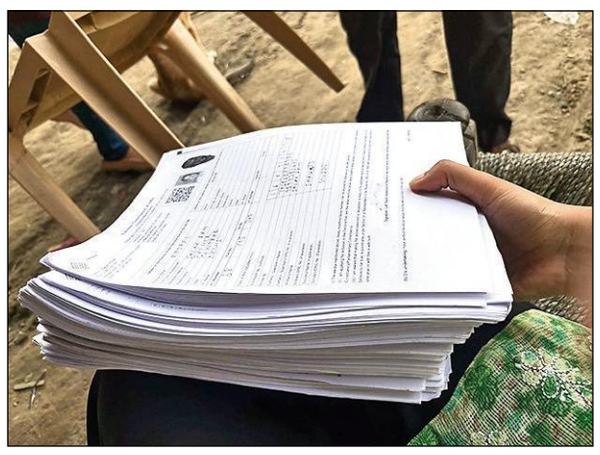

"Demolition can happen anytime. The situation is already uncertain. We didn't get any notices. If our right to vote is also taken away, where will we go?" he said.

SIR rules require BLOs to visit households, distribute preprinted enumeration forms in duplicate and make at least three visits to collect them. One copy is retained by the BLO and the acknowledged copy given to the elector. If an elector's name, or that of a parent or grandparent, cannot be linked to Delhi's 2002 SIR roll, the form can still be submitted without those details. The ERO may then seek supporting documents during the notice phase.

The area BLO and SDM did not respond to calls or messages sent by **TOI**.

"In SIR, the registered address is crucial for verification. In areas that have seen repeated demolitions, where jhuggis are removed and their numbers change, identifying a valid registered address becomes difficult," an EC official said.

Residents can submit Form 6, with the required clarification and documents, for inclusion at the new address, officials said.

Residents say the issue is not simply how long they have lived here or whether they have voted before, but where their address is recorded

BOARDS AND POTS: ROSES ALL THE WAY

Piyal Bhattacharjee

New Delhi Municipal Council is beautifying the BRICS Friendship Rose Garden in Chanakyapuri for the summit. The garden, in Chanakyapuri, was established in 2016 to showcase unity and friendship among the BRICS nations, senior officials said. It features 107 varieties of rose plants and is maintained and managed by NDMC

NDMC plans to install floral boards at 15 locations, while floral fountains will be placed at nine prominent spots. More than 15,000 potted plants, prepared at NDMC nurseries, are being displayed along major roads, intersections, roundabouts and other important locations

CNG vehicles won't get fuel if they don't have hydro-test certificate: IGL

TIMES NEWS NETWORK

New Delhi: Owners of CNG-run vehicles will be denied fuel if they don't have a valid hydro-test certificate, Indraprastha Gas Limited (IGL) said Wednesday.

IGL said it was conducting a special safety drive across all its CNG stations, with staff at fuel pumps verifying the validity of hydro-test certificates before dispensing fuel to ensure compliance with safety requirements.

"CNG will not be dispensed if a valid hydro-test certificate is not available. Customers are requested to get their CNG cylinders tested on time and always carry the valid certificate in the vehicle," the company stated.

The move comes days after Petroleum and Explosives Safety Organisation (PESO) issued directions in this regard. Under Rule 35(1) of Gas Cylinder Rules, 2025, every CNG cylinder must undergo a hydrotest once every three years at a PESO-approved cylinder testing centre.

PESO directed stringent safety enforcement across Delhi-NCR following a recent cylinder blast that killed three people and injured two at a retail outlet in the city last month. The advisory is aimed at preventing untoward incidents by tightening on-ground checks.

PESO has also instructed all city gas distribution companies to prominently display safety signage at CNG outlets and ensure that fuel is dispensed only to cylinders that meet approved standards and have a valid hydro-test certificate.

Worker dies, 4 injured as oxygen cylinder explodes in SE Delhi

TIMES NEWS NETWORK

New Delhi: A 35-year-old man was killed and four others were injured when a commercial oxygen cylinder exploded at a godown in southeast Delhi's Okhla Wednesday morning.

The incident came to light after Okhla Industrial Area police station received a call about an explosion at 10.43 am, prompting police to rush to the spot. Officers found a commercial truck registered to a firm, which had transported the commercial oxygen cylinders from Ghaziabad to the site.

Preliminary inquiry revealed that the firm has been operating as a trader and distributor of industrial oxygen cylinders from the rented premises at D-23, Okhla phase I, for the past one to two years.

According to the firm's manager, the vehicle carrying oxygen cylinders had arrived from Ghaziabad at the site in the morning. While workers, Umesh, Mohit and Pankaj, were unloading and shifting the cylinders inside the godown, one cylinder fell from the vehicle, triggering an explosion.

The blast killed Mohit Singh (35), a helper and resident of Jaitpur in Delhi, who was originally from Uttar Pradesh's Etah district.

A relative, Vishnu, said Singh had been working as an oxygen-cylinder supplier for nearly 25 years. "He was the sole breadwinner for his family, which includes two children, a 10-year-old son and a 14-year-old daughter. At the time of the incident, he was unloading the cylinders when one of them exploded," he said.

Vishnu said the family learnt about the incident after his brother-in-law received a phone call from the spot, following which other relatives were informed.

Four others – Umesh, Arvind, Manoj and Pankaj – suffered injuries and were shifted to AIIMS. Police said their medical condition was being assessed.

The spot has been secured and an investigation is under way. Technical and forensic teams will examine the cylinder, vehicle and other evidence to ascertain the cause of the explosion.

Police said the firm handles around 70-80 cylinders daily, though the figure is being verified. Cops are also verifying licences, permissions, ownership and compliance with transportation norms.

The spot has been secured and an investigation is under way

BRICS: Vigil over social media to curb inflammatory content

▶Continued from P1

In all, over 50,000 police personnel are being mobilised across the capital, supported by units from National Security Guard, Special Protection Group and Central Armed Police Forces to safeguard the BRICS Summit.

To ensure a welcoming aesthetic, personnel deployed at hotel venues and summit sites are likely to shed traditional uniforms in favour of tailored black or grey safari suits and formal civilian attire, equipped with specialised identification cards, sources said.

For extreme emergencies, commandos have conducted helicopter slithering drills from heights up to 10 metres, enabling rapid rooftop tactical insertions onto hotel premises if needed. Continuous aerial surveillance over sensitive localities in central and north Delhi is being maintained using high-definition drones.

To fine-tune carcade movements and escort protocols, several rehearsals have been conducted. Vigil is being kept over social media to curb inflammatory content and rumour-mongering. Quick response teams will guard monuments and markets in case the dignitary families decide to visit them.

Juvenile among 3 held for murder

New Delhi: Days after a property dealer was shot dead in outer Delhi's Narela, police Tuesday arrested two men and apprehended a juvenile in connection with the murder.

The incident was reported on Sept 3 after cops received a call about a man being shot dead by motorcycle-borne assailants. The deceased was identified as Pramod, a resident of Sonipat in Haryana.

Joint commissioner of police (Northern Range) Vijay Singh said, "On Tuesday, cops received a tip-off that three suspects would arrive in Sector 23-24, Rohini, on a motorcycle. A trap was laid and the suspects were held." TNN

Repurposed pier C at T3 to handle summit traffic

TIMES NEWS NETWORK

New Delhi: Ahead of the 18th BRICS Leaders' Summit, pier C at IGI Airport's Terminal 3, which has been repurposed from domestic to international operations, will be progressively operationalised from Wednesday night. Delhi International Airport Limited (DIAL), the airport operator, is augmenting international passenger-handling capacity at T3 to cater to the expected rise in international air traffic.

Pier C will facilitate international traffic, with both international arrivals and departures planned to be handled from Thursday evening. "The phased operationalisation will provide additional flexibility and capacity to manage the expected increase in international movements during the summit period," DIAL said.

Once fully operational, annual capacity for international passengers at Indira Gandhi International Airport will increase by 50% to 31 million passengers per annum. "The move is part of DIAL's comprehensive preparedness plan, undertaken in close coordination with CISF, Bureau of Civil Aviation Security, airlines, ground-handling agencies, immigration, customs and other key airport stakeholders, to ensure seamless and secure airport operations during the high-profile international event," DIAL said.

Once fully operational, annual capacity for international passengers at Indira Gandhi International Airport will increase by 50% to 31 million passengers per annum

The summit, being hosted from Sept 11 to 13, is expected to bring together leaders and senior delegations from BRICS member and partner countries, along with heads of international organisations and business representatives.

DIAL CEO Pradeep Panicker said the airport was fully geared up to welcome leaders, dignitaries and international delegations. "We have undertaken comprehensive preparedness measures... to efficiently manage the anticipated increase in international traffic while maintaining the highest standards of safety, security and passenger experience."

In April, DIAL said pier C had been repurposed without new construction. "The conversion enhances the ability of T3 to accommodate next-generation and wide-body aircraft," it had said.

Pier C at IGI will facilitate international traffic, with both international arrivals and departures planned to be handled from Thursday evening

Hospitals gear up for key event, emergency services to be functional

Anuja.Jaiswal
@timesofindia.com

New Delhi: Hospitals in Delhi have stepped up medical and emergency preparedness ahead of the 18th BRICS Leaders' Summit, with officials in the health ministry saying arrangements have been put in place at hospitals and other locations which dignitaries are expected to visit.

"All hospitals have been appropriately geared up. Facilities, including medical facilities and emergency care, have been detailed at all locations where the dignitaries are likely to visit. All steps and procedures are in place," a health ministry official said.

At Ram Manohar Lohia Hospital, an emergency duty roster has been made by the department of surgery, with teams assigned for each day of the summit. The hospital has made provisions to mobilise additional surgeons for emergency procedures and operation theatre services, if required.

AIIMS, which had earlier notified closure on Sept 11 for the summit, has withdrawn the order. It will remain open.

Private hospitals have also strengthened their contingency arrangements. At PSRI Hospital, the emergency department will remain operational round the clock, with arrangements for first aid, trauma stabilisation and critical admission care for patients who may be routed from the summit.

PSRI Hospital has earmarked 21 disaster beds, kept OTs on standby and deployed a 20-member quick response team. Mock drills have tested response times and patient-transfer procedures, while chief district medical officer, south, officials inspected the hospital's disaster protocols. "We have advanced cardiac life support ambulances for handling emergencies," said Dr Anju Wali, medical director, PSRI Hospital.

At Indraprastha Apollo Hospital, ICU and other critical-care beds have been kept available. The plan covers hospitals and nursing homes such as Dr BL Kapur Memorial Hospital, Sir Ganga Ram Hospital, Primus Super Speciality Hospital, Max Smart Super Speciality Hospital, Saket and Patparganj, Escorts Heart Institute and Research Centre, and ISIC Multi Speciality Hospital.

Dengue Prevention is Simple!

Alertness can save you & family from Dengue

Dengue mosquito breeds in clean stagnant water

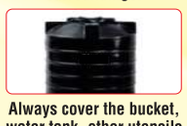

Prevent Mosquito breeding

Don't allow water to stagnate inside your home, in flower vase and anywhere in the surroundings.

Empty the water cooler every week or put some oil / petrol in it.

Always cover the bucket, water tank, other utensils properly

Don't throw broken utensils, bottles, tins, tyres and coconut shells or disposables in the open

Prevent Mosquito bites

Wear full sleeves and use mosquito repellants

Use mosquito net at home & hospitals regularly during fever

Symptoms of Dengue

High Fever

Severe pain behind the eyes that increases with eye movements

Headache, muscle and joint pain

Stomachache

Nausea and vomiting

Rashes on body
